e soaring twin towers of the World Trade Center.

Federal, State Officials Dedicate World's Largest Buildings in N.Y.

NEW YORK, April 5 (NYT).—The World Trade Center, its 1,350-foot towers, the tallest and largest buildings in the ld, was dedicated formally yesterday by Govs. Nelson A. kefeller of New York and William T. Cahill of New Jersey. In a message read at the ceremonies in the lobby of one the twin 110-story towers, President Nixon called the center major factor for the expansion of the nation's international de."

Mr. Nixon's message was to have been read by Labor Secary Peter J. Brennan. Mr. Brennan, however, refused to ss a picket line of railway carmen who are striking the conter railroad of the Port Authority of New York and New sey, the bistate agency that operates port facilities and that built and owns the World Trade Center. His speech was d to the audience of city, state and foreign officials by nes C. Kellogg 3d, chairman of the Port Authority.

The complex, which includes two nine-story satellite build- s and an eight-story U.S. Customs House, is situated on a acre site near the financial district in lower Manhattan.

The center's 9 million square feet of office space surpass t of the 18 buildings which now comprise Rockefeller Center. present, 304 firms, employing 7,000 people, are in the trade ter. When it is fully rented, 800 firms and 50,000 people l occupy it.

Besides the tenants, the World Trade Center is expected ttract about 80,000 visitors a day.

Wholesale Prices Up 2.2% in U.S.

Rise in March Highest Since '51

By Fred Farris

WASHINGTON, April 5 (IHT).—Led by a record jump in food costs, wholesale prices rose 2.2 percent in March for the sharpest one-month increase since 1951, the government reported today.

The soaring prices, led by a 4.6 percent rise in wholesale costs of farm products and processed food, dramatized congressional action yesterday aimed at rolling back prices to Phase-2 levels, before President Nixon dropped most mandatory price controls.

The 4.6 percent boost, on a seasonally adjusted basis, was the sharpest increase since the government began to keep such records in 1947.

The gloomy figures brought a wary statement from President Nixon's chief economic adviser, Herbert Stein, who conceded that further controls might have to be invoked to stem the accelerating price inflation.

"The controls system will be adapted as necessary to play its most useful role in restraining inflation," Mr. Stein said.

The White House is under strong pressure from Congress and the nation to act to curb sharply rising prices, and labor is growing impatient with administration reluctance to reimpose controls.

AFL-CIO president George Meany called the latest price statistics "proof positive that all food prices must be controlled stringently and at once."

Mr. Meany called on Congress to adopt the one-year extension of economic controls approved last night by the House Banking Committee. The panel added to the bill an amendment rolling back prices, interest rates and rents to Jan. 10, 1973 levels, "when they were already high enough," Mr. Meany said. A floor fight is expected and today's price report strengthens the partisans of controls.

Mr. Stein expresed disappointment that industrial prices rose last month at a "substantial 1.2 percent."

But he reported "evidence that prices of several key farm products have leveled off or declined since mid-March," when the Wholesale Price Index was taken.

The Wholesale Price Index (WPI) rise of 2.2 percent last month comes to a yearly rate of 26.4 percent; the upsurge in farm products and finished foods comes to an astonishing 53.1 percent annual rate in the December-March period. In the previous three months, processed foods rose at a 30.1 percent annual rate.

The WPI stands at 129.7, 10.5 percent above a year ago.

The 1.2 percent increase in industrial commodity prices last month is the steepest climb since January, 1951.

By adding the price rollback to the extension, until April 30, 1974, of the Economic Stabilization Act, which gives the President discretionary power to control wages and prices, the House Banking Committee challenged Mr. Nixon to veto it. He can be expected to reject it as now written.

FLOOD FIGHTERS—Volunteers putting up sandbag levees in a St. Louis suburb, trying to contain a tributary of the flooding Mississippi which is expected to crest today at approximately 10 feet above flood stage in downtown St. Louis and higher downstream.

Coast Guard Reserves Called to Fight Flood

WASHINGTON, April 5 (AP).—Concerned about serious flooding in the Mississippi Valley, President Nixon authorized today the first peace-time call-up of the Coast Guard Reserve.

Mr. Nixon gave Secretary of Transportation Clause S. Brinegar permission to summon immediately three reserve units, totaling about 143 men. One unit is stationed at Peoria, Ill., and two are from St. Louis.

Mr. Brinegar said that all will report to the Coast Guard base at St. Louis for assignment in flooded areas along the Mississippi and its tributaries, and more will be called if needed.

Floodwaters of the Mississippi and Missouri Rivers have stabilized. But a Corps of Army Engineers spokesman at Winfield, Mo., said that the situation still was critical, with levees soaked and weak from days of pounding by rain and floodwaters.

The known death toll is six. About 4,000 persons have been driven from their homes in Missouri and Illinois alone.

Saigon Reports Several Major Attacks by Reds

By Joseph B. Treaster

SAIGON, April 5 (NYT).—The South Vietnamese government reported several big Communist attacks tonight.

A spokesman said that in the most significant actions, the Communists had assaulted two government infantry positions, one in the Mekong Delta and the other in the Central Highlands, with at least a battalion of 300 to 500 men and had fired almost 800 shells into an outpost near Hué.

[Attempts by Canada and Indonesia on the International Commission of Control and Supervision to stop the fighting bogged down in procedural wrangles with Poland and Hungary, the commission's two other members, the Associated Press reported.]

The spokesman said that there had been a considerable increase in military activity across the country in the last two days. But American officials said there had been several clashes since the beginning of the cease-fire larger than those reported tonight.

One senior South Vietnamese officer said that "this is not the beginning of an offensive."

"These attacks are preliminary activity. They want to know what our reaction will be," he continued. "They are probing. They want to know exactly what our allies will provide."

There are more than 600 American fighter-bombers and heavier B-52 bombers a few hours away in Thailand and Guam ready to assist the South Vietnamese. There is also at least one aircraft carrier with fighter-bombers off shore in the South China Sea.

American and South Vietnamese intelligence officials have reported that the Communists are in the midst of a major buildup of war materiel in South Vietnam and that they have been reinforcing their fighting units.

Many main-line fighting units are below effective fighting strength, these officials say, but the infiltration is continuing.

One senior officer said that he expected peaks of sharp but limited fighting to continue for the next several weeks until the Communists were satisfied that they had "enough supplies and enough troops."

Then, he continued: "They're going to come in force. We do not ask ourselves if the Communists will have an offensive. The question is when."

[The reports of a possible enemy offensive were played down in the Pentagon. Maj. Gen. Daniel James told a Washington briefing that the fighting was a continuation of cease-fire violations and not "a forerunner to an offensive," AP said.]

There are some Americans in Saigon who believe the Com-

(Continued on Page 2, Col. 4)

Thieu Vows Never to Ask For U.S. Troops

WASHINGTON, April 5 (AP).—President Nguyen Van Thieu declared today that he never will ask American troops to return to Vietnam to help defend his country.

"I am very confident our army and our people can defend themselves from an all-out North Vietnamese offensive," he told a National Press Club luncheon meeting.

The South Vietnamese leader, speaking in English, appeared unperturbed by anti-war demonstrators bearing placards outside the press club building.

Mr. Thieu outlined Vietnam's need to make a smooth transition from war to peace, and he made it clear that he would like the United States and other countries to aid in the reconstruction of South Vietnam.

Foreign Minister Is a Surprise

Pompidou Appoints Cabinet: His Own Men, Not De Gaulle's

By James Goldsborough

PARIS, April 5 (IHT).—The new French government was named today, with the biggest surprise being the nomination of Michel Jobert. President Georges Pompidou's chief presidential aide, as foreign minister.

The new government bears the strong personal mark of Mr. Pompidou and is the first since he came to power in 1969 that is free of men who owed their loyalty exclusively to Gen. de Gaulle.

Mr. Pompidou and Prime Minister Pierre Messmer have both said this would be a government of "reform," capable of winning back the voters who defected heavily in the March elections.

To emphasize that this was a government of men loyal to him, Mr. Pompidou did away with the special status of minister of state, which in the past had been bestowed on leading political figures like Michel Debré, Edgar Faure and Roger Frey. Under the practice here, a minister of state had responsibility not only for his ministry, but for all government affairs.

The nomination of Mr. Jobert came as a surprise. There had been rumors for several days that Mr. Pompidou would name a nonpolitician to head the Quai d'Orsay, but no one, not even French diplomats, was speculating on Mr. Jobert.

Little known inside France, Mr. Jobert is better known outside. He has been Mr. Pompidou's special adviser for 10 years, specializing in foreign affairs since 1969. Earlier he was one of the chief aides to former Premier Pierre Mendès-France. He has accompanied Mr. Pompidou on all his official trips, including those to the United

Michel Jobert, named as France's foreign minister.

Watergate Investigation

eindienst Says Senators n't Arrest Nixon Aides

HINGTON, April 5 (AP). rney General Richard G. ienst says the Senate has ver to arrest White House who refuse subpoenas to on the Watergate case.

Sen. Sam J. Ervin jr., C., chairman of the Water- vestigating committee, says torney general is "clearly "

dispute came yesterday as ien convicted in the break- bugging of the Democratic al headquarters in the gate Building agreed to talk ederal grand jury.

Kleindienst told newsmen rvin was off base in say- Senate can hold the threat est and jail terms over House aides refusing to co- e with its investigation.

Ervin said he can point ast 15 Supreme Court deci- backing his viewpoint.

isputing this, Mr. Klein- said, "When you are talk- out the close confidential rs of the President of the States, without whom a ent cannot function, then k . . . you could not arrest ut in jail that person, be- you would, in effect, be put- jail the President of the States . . .

hink what you really have is, could Sen. Ervin arrest resident . . ." Mr. Klein- said. "I think we would , no he could not."

ion't intend to make the ." Sen. Ervin replied at this conference. "The sergeant at and his posse will do that."

Kleindienst refused to say ite House aides will be sent the Watergate grand jury, the President has said he llow them to take.

grand jury meets in secret, Sen. Ervin, Sen. Howard R., Tenn., and other sena- have said they want the to testify in public and un- th.

victed Watergate defen- Bernard L. Barker and lo Martinez appeared be- he grand jury yesterday af- n after U.S. District Court John J. Sirica granted them immunity from future prosecution. Their attorney said they answered all questions put to them. Barker was before the jury about 2 1/2 hours; Martinez about an hour.

Chief prosecutor Earl J. Silbert said that the grand jury was through with Barker and Martinez and that two other men who pleaded guilty with them, Frank Sturgis and Virgilio Gonzalez, would appear before the panel today. The four, until granted immunity, had refused to answer grand-jury questions.

James W. McCord, another convicted Watergate burglar, was to testify also.

Harsher Laws Given Moses In Dead Sea Scroll Version

JERUSALEM, April 5 (AP).—The most recently deciphered Dead Sea Scroll contains a hitherto unknown version of some of God's commands to Moses, and they are far more puritanical than the biblical injunctions, archaeologist Yigal Yadin said last night.

Prof. Yadin, of Hebrew University, has finished deciphering the parchment, known as the "Temple Scroll." The first discoveries of Dead Sea Scrolls came in caves at Qumran, near the Dead Sea, in the late forties and early fifties. The 2,000-year-old parchments include virtually all of the Old Testament, and other writings, and are regarded as the most important documentary discoveries in biblical archaeology.

The Temple Scroll also offers intriguing points as to what formed the basis of Christianity, which was new when part of the scroll was written.

The Temple Scroll is the longest—nearly 30 feet—of all the parchments and leathers found near Qumran.

Prof. Yadin, in a public lecture at Hebrew University, said that the scroll is fairly well preserved, but humidity had turned some of it into pulp. On some portions, ink had adhered to layers of parchment so that the writing was reversed.

The Old Testament says that God handed down to Moses the Ten Commandments, plus 603 other rules, which included which animals and fish it was permissible to eat and how far a person should walk to attend prayers. The scroll version of the Ten Commandments did not differ from that of the Old Testament. But many others of God's rules were much harsher, Prof. Yadin said.

He gave these details on other aspects of the scroll:

● It is written in the first person, as if God was speaking, rather than in the third person of the Old Testament.

● It contains laws never mentioned in the Old Testament, such as one which states that the Jews must choose a king and build a temple.

● It gives an intricate explanation of how the Jewish temple in Jerusalem should be built, and what kind of city Jerusalem should be.

Prof. Yadin says he believes that the Qumran sect wrote the laws, in Hebrew, about two centuries before Christ. They were

China Claim of Soviet Threat Denounced by Kosygin as 'Lie'

STOCKHOLM, April 5 (UPI).—Soviet Premier Alexei N. Kosygin said today that Peking's claim that the Soviet Union is threatening China was a "lie from beginning to end."

The Kremlin leader also said that he trusted President Nixon to continue to honor the Paris peace agreement on Vietnam.

Mr. Kosygin, after talks with Swedish Premier Olof Palme, said at a news conference that the Soviet government was convinced that the European security conference could be convened next June, despite the lack of progress in the East-West troop cut talks in Vienna.

He also commented on world peace, the Middle East situation and other international issues.

Mr. Kosygin saved his harshest words for China and, to some extent, for Israel.

"Tension does exist in our relations with China, but it is because of no fault of ours," he said.

"For some reasons, the Chinese leaders have been shouting about a Soviet threat to China. It is a lie from beginning to end."

Sino-Soviet Talks

Mr. Kosygin said that the Soviet-Chinese talks in Peking had been going on for four years "but we have no ground to say that they have moved very far ahead. We want to bring about a normalization of our state relations with China," he said.

On Indochina, he said that Russia will do all "that depends on us to implement the Paris agreement" on Vietnam. Asked whether he trusted Mr. Nixon to do the same, Mr. Kosygin replied:

"The statements repeatedly made by the President of the United States also indicate that the United States is striving to observe the Paris agreement."

Mr. Kosygin said that the Soviet Union would do its utmost to get the European Security Conference convened by next June.

"This is also the desire of a vast majority of other European nations and the United States and Canada," he said.

He said that the Russians "are in favor of broad movement of people and information"—a key issue at the conference—but that the time had not come to work out the details of that issue.

Mr. Kosygin reiterated the Soviet position on the Middle East and

(Continued on Page 2, Col. 3)

U.S. Officials Arrive to Staff Peking Office

PEKING, April 5 (Reuters).—American officials, headed by a career Foreign Service officer, Alfred Jenkins, arrived in Peking tonight to open a liaison office and establish the first official American presence in the Chinese capital since the Communists came to power in 1949.

The seven Americans were greeted on arrival from Canton by Han Hsu, China's director of protocol, who has been named deputy head of China's liaison office in Washington, and by Chen Da-gung, of the Foreign Ministry.

In a brief airport statement, Mr. Jenkins said that he was delighted to return to Peking, where he served in his first post more than 20 years ago.

He added that the liaison office would not open formally until the arrival within a month of David K.E. Bruce, named by President Nixon to head the office which was agreed to during the February visit here of Henry A. Kissinger, U.S. special envoy.

AP.

Prompted by Continued Fighting

Senate Votes to Bar Hanoi Aid Unless Approved by Congress

By Spencer Rich

WASHINGTON, April 5 (WP).—The Senate overwhelmingly approved today an amendment barring all aid to North Vietnam unless Congress specifically approves it.

Sen. Harry F. Byrd jr., a Virginia independent, said his amendment was intended to send "a clear signal to the White House that its proposed reconstruction aid program for North Vietnam will be extremely difficult to get through Congress at a time when North Vietnam is still carrying on combat activities and when massive financial problems in the United States are forcing slashes in key domestic programs."

The administration at first strongly opposed the amendment, which started out as a flat ban on all aid to Hanoi.

Sen. Byrd, however, slightly softened the language before today's vote by adding the words "unless specifically authorized hereafter by the Congress."

Some senators said that change merely put the Senate on record as requiring congressional approval before any aid, rather than declaring outright that no aid would be given.

Administration Yields

At this point, administration forces, knowing that the amendment would pass overwhelmingly, declared the change had rendered the language less objectionable because the President has already promised to ask congressional approval.

The administration spokesmen then withdrew their opposition, and the measure passed, 88 to 3.

Critics of the Cambodia war, led by Sens. Mike Mansfield, D., Mont., George S. Mcgovern, D., S.D., and Frank Church, D., Idaho, used the debate to launch assaults on President Nixon's continued bombing of Communist forces in Cambodia, declaring the President's action has no legal or constitutional basis.

Sen. McGovern proposed an amendment to block the Cambodia bombing, but it was ruled out of order—to the relief of Sen. Church and others who believe the time is not yet ripe to force a vote on the issue. They fear that defeat on such an amendment would appear to give the President a mandate to continue the Cambodia bombing.

Sen. William Proxmire, D., Wis., speaking in support of the Byrd amendment, told the Senate that the administration has billions of dollars in the military and foreign-aid pipeline now destined for other countries but theoretically transferable to North Vietnam.

Sens. Byrd and Proxmire said the Byrd amendment would block absolutely any attempt by the administration to rechannel these funds into North Vietnamese aid without the consent of Congress.

Nixon Withdraws Gray Nomination As FBI Director

SAN CLEMENTE, Calif., April 5 (AP).—President Nixon announced today that he was withdrawing the nomination of L. Patrick Gray 3d to be director of the Federal Bureau of Investigation. He said he acted at Mr. Gray's request.

Mr. Nixon, who did not say whom he would name to succeed Mr. Gray, the acting head of the bureau, said that he had asked Mr. Gray to remain until a nominee is confirmed.

The President said, after talking to Mr. Gray by telephone, "It is obvious that Mr. Gray's nomination will not be confirmed by the Senate."

In a brief statement in Washington, Mr. Gray said:

"The basis for this decision is my deep conviction that the FBI, a great and unique American institution of vital service to the President and the American people, is entitled to permanent leadership at the earliest possible time."

Mr. Gray, who has headed the law-enforcement bureau since the death of J. Edgar Hoover last May, has become entangled in the controversy over the bugging of Democratic national headquarters in the Watergate complex.

Worker's Death in Barcelona Brings New Protests in Spain

From Wire Dispatches:

BARCELONA, April 5.—Barcelona units of the Workers' Commissions, a leftist group that has been banned and operates clandestinely, called today for a general strike here tomorrow to protest the police killing of a construction worker in a union demonstration Tuesday.

The leftists' appeal followed brief wildcat strikes in factories yesterday and fast-moving street demonstrations by student groups last night. But there was no immediate indication that rank-and-file workers would heed the call to paralyze Barcelona, Spain's second city and its prime industrial center.

Manuel Fernandez, the 27-year-old laborer shot dead Tuesday in suburban San Adrian de Besos, was buried yesterday in a ceremony unmarked by violence. He was the fifth worker slain in clashes between police and strikers in Spain in the last 18 months.

A group of his fellow workers last night filed a petition with a magistrate for an official investigation into Tuesday's incident.

Today, helmeted riot police, many of them on horseback, invaded the campus of Madrid's Central University to head off student protests against the death of the worker in the Barcelona suburb.

Groups of students blocked several roads leading through the campus with rocks and timber from nearby building sites. Others ran through streets just off the campus, shouting anti-government slogans. Similar slogans were daubed on the walls of the university buildings.

Protest assemblies in several Central University schools were broken up by police inside the buildings, student sources said.

They said that several students were arrested, but that there were no major clashes with police.

The Barcelona killing sparked other protests in Spain, including student unrest on other campuses and statements by the cardinal who is archbishop of Barcelona and by the Barcelona bar association.

Narciso Cardinal Jubany, one of the 30 cardinals named by Pope Paul VI a month ago, issued a note in which he said that "social injustice" was at the root of Tuesday's clash.

Reforms Seen Needed

Cardinal Jubany, a Catalonian who until now has been cautious in his pronouncements on socio-political affairs, said that conflicts could be avoided "if the necessary reforms are made in time."

No Spanish news agency published the cardinal's note today.

Church sources said that Cardinal Jubany's note would be distributed to all the bishops of Spain to be read in churches on Sunday unless Spanish newspapers are allowed to print it.

The Barcelona bar association expressed its "profound preoccupation" with the incident and asked that "the rights and freedom of the individual be sufficiently guaranteed."

Leftists Seen Trying to Bar Peronist Rule

BUENOS AIRES, April 5 (UPI).—The military government has pledged that a wave of political kidnappings this week will not impede the May 25 inauguration of Peronist president-elect Hector J. Campora. Argentina's outgoing junta said that the abductions are designed to delay the changeover to civilian rule.

[The Associated Press said some observers believe that the increase in leftist terrorism is an attempt to provoke the military into remaining in power with the hope that this would provoke a Peronist uprising and chaos which would benefit the Communists. Others believe the guerrillas are trying to foment an open break between the Peronists and the army over the Peronists' campaign promise of amnesty for political prisoners.]

There have been four confirmed kidnappings or abduction attempts since Monday and today military sources reported that the daughter of a powerful general had been kidnapped, although the general's command said the reports were "inexact."

General's Daughter

According to the unconfirmed reports, the daughter of Gen. Manuel Aroldo Pomar, commander of the 10th Infantry Brigade, one of the three most powerful units stationed near Buenos Aires, was kidnapped.

Three persons kidnapped earlier this week are still missing, and an army colonel was slain resisting abduction yesterday. A man kidnapped last week, Gerardo Scalmazzi, manager of the Bank of Boston branch in Rosario, was released yesterday after a ransom was paid, the bank said. Reports on the ransom's size varied from $75,000 to $1 million.

In the past three weeks, the government has blamed leftist extremists for the shooting of six policemen, three attacks on police stations, an attack on an atomic energy plant and more than a dozen bombings.

India Is Sending Troops to Sikkim As Regime Falls

NEW DELHI, April 5 (Reuters).—The administration of the tiny Himalayan kingdom of Sikkim has collapsed, rebel forces have taken over and Indian troops are en route to the kingdom, according to reports reaching here today.

The Press Trust of India news agency reported from Sikkim's capital, Gangtok, that the ruler, Chogyal Panden Thondup Namgyal, had asked for Indian military assistance. Sikkim is an Indian protectorate.

It was reported that police fired on rebels in the capital's main market area and three persons were killed before the rebels took over. The rebels have been demanding electoral and administrative reforms.

The Chogyal and other members of the royal family were confined to the palace, reports said. The Gyalmo, or queen, is the former Hope Cooke, a former New York socialite who married the Chogyal in 1963.

Associated Press.

DIPLOMATIC LINES—Swedish Premier Olof Palme (far right) and Soviet Premier Alexei Kosygin (next to Mr. Palme) fishing with aides in Göteborg Wednesday.

Comments in Sweden

Kosygin Says China Lies About Soviet Peril

(Continued from Page 1)

said that there would be no lasting peace until "Israeli aggression is ended and occupied territories are returned."

He said that the Soviet Union would honor its treaty with Egypt and continue arms deliveries "because we feel Egypt needs a strong army to defend itself against aggression and to liberate its territory."

He said that the Soviet Union could not resume diplomatic relations with Israel "because we cannot treat the aggressor and the aggressor's victim the same way."

He said that Israel and other anti-Soviet forces were spreading lies about "the nonexistent Jewish problem in the Soviet Union."

Asked about the tax on Jews emigrating to Israel, Mr. Kosygin said, "We have not changed the law calling for compensation for education and training."

But he said that Soviet authorities had been granted the right to reduce the tax or even to waive it in cases of Jews who could not pay the full tax.

Mr. Kosygin will end his five-day official visit to Sweden tomorrow morning.

In a joint communiqué, both governments said the visit will lead to closer cooperation between them in trade, economy and technology. Mr Kosygin invited Mr. Palme to visit the Soviet Union at a date to be decided on later.

Harsher Laws Given Moses In Dead Sea Scroll Version

(Continued from Page 1)

copied in the Temple Scroll during the time of Jesus, he said.

The scroll ordered priests to be celibate, banned bigamy and divorce among other persons, and said the temple should not be rebuilt if it could not be built according to specifications.

The early Christians, seeking escape from the laws of Moses, found that the Qumran sect had created "an ad hoc religion," to serve until Judaism as they wanted it to be could be realized in Jerusalem, Prof. Yadin said.

The "ad hoc religion," while only a temporary phase for the Qumran people, appears to have deeply influenced the first Christians, Prof. Yadin said.

The sect had no temple and it preached ethics that suited the aims of the Christians. Its strictures on sexual conduct were the "nucleus" of Christian views to come, Prof. Yadin said.

He said he hopes to publish the scroll this year. He did not give specific examples of the more puritanical aspects of the scroll.

There has been a hiatus of more than five years since the last scroll was published. A controversy arose after the 1967 war, during which Israel seized some of the scrolls, which were held by Jordan. Israel had purchased some of the manuscripts before the war.

Prof. Yadin, a former general who commanded the Israeli Army in the 1948 war against the Arabs, said he purchased the Temple Scroll during the 1967 war. He said he paid $100,000 to an Arab antiquities dealer in Bethlehem for the scroll.

Pompidou Appoints Cabinet: His Own Men, Not De Gaulle's

(Continued from Page 1)

States and Soviet Union. His wife is American.

With Mr. Jobert at the Quai d'Orsay it would appear that foreign affairs will again become what they were under Gen. de Gaulle, the "special domain" of the president.

As expected, the Independent Republicans, the UDR Gaullists' coalition partners, increased their weight in the new government from two ministers to four. Moreover, the new government includes their party chief, Michel Poniatowski, who has never been popular in Gaullist circles.

Many of the men prominent in the last government remained. They include Valéry Giscard d'Estaing, the finance minister; Raymond Marcellin, interior minister; Olivier Guichard, public works minister; Joseph Fontanet, education minister; and Jacques Chirac, agriculture minister. Of these men, only Mr. Guichard and Mr. Chirac are UDR Gaullists.

Several of the key political figures in the last government already had departed, and they were replaced today by men with considerably less political following. The departed include Maurice Schumann, former foreign minister, and Rene Pleven, former justice minister, both defeated in the elections last month, Mr. Faure, who was elected president of the National Assembly, and Mr. Debré, who was left out of this government.

They were replaced by Mr. Jobert, foreign minister; Jean Taittinger, of the champagne family, justice minister; Mr. Poniatowski, health and social-security affairs, and former transport minister Robert Galley, who replaces Mr. Debré. Mr. Galley will be called armed forces minister, not national defense minister, Mr. Debre's title.

In Mr. Galley's case, as in that of Mr. Jobert, Mr. Pompidou appeared to be showing his interest in bringing a key ministry safely under his own wing.

Culture Minister

In another change, Maurice Druon, a writer and member of the Académie Francaise, becomes culture minister. Like Mr. Jobert, Mr. Druon is nonpolitical and illustrates Mr. Pompidou's desire to end the practice of taking the cabinet exclusively from National Assembly ranks. Some observers think this will eventually lead to a completely presidential cabinet, which, after a constitutional change, would no longer be responsible to the Assembly.

Philippe Malaud, who with Mr. Giscard d'Estaing, Mr. Marcellin and Mr. Poniatowski is a Giscardian, becomes information minister, a post that did not exist in the last government. He will be given charge of the state-run radio and television networks.

Several minor ministers in previous De Gaulle governments make a reappearance, including Alain Peyrefitte, the present UDR party chief, named to the newly created post of minister for administrative reform; Yves Guena

Saigon Says Reds Launch Several Major Assaults

(Continued from Page 1)

munists are unlikely to unleash an offensive on the scale of the one last spring.

"That would be sure to bring the bombers back," one American said. "I think you're going to see them gradually turning up the heat, taking as much from Saigon as they can get and hoping it won't look bad enough to justify bringing back the air. They don't want the bombers and they also know Nixon hopes he doesn't have to use them, so they are going to do their best to see that things work nicely all the way around."

The heaviest casualties reported today were in the action in the Mekong Delta about 50 miles southwest of Saigon where 16 Communists and 23 government soldiers were said to have died. Another 56 government soldiers were listed as wounded.

Details Sketchy

Details of the clash were sketchy, but the South Vietnamese spokesman said the Communists had begun a shelling attack on government troops in a relatively open position and then followed up with an infantry assault.

In the Central Highlands, 51 government rangers were wounded and 34 were listed as missing after an outpost and several surrounding observation positions 15 miles southwest of Pleiku were shelled then attacked by ground troops. There was no report of Communist losses.

In the incident near Hué, the shelling of a small outpost in the foothills 11 miles southwest of the former capital killed two government soldiers and wounded 25.

American officials said the heavy shelling seemed to indicate that the Communists had received fresh supplies.

In yet another action, the spokesman said that the government ranger camp at Tong Le Chan, north of Saigon, which has been under siege since February, was shelled for another day.

Efforts to negotiate an end to the fighting at the ranger camp have been fruitless.

3 in London Get Smallpox, But No Alarm Seen

LONDON, April 5 (Reuters).—The Health Ministry declared London a "smallpox-infected area" today after three cases were confirmed here. But it said there was no cause for alarm.

The department said that more cases were possible, although "the full drill for the containment of smallpox is already in operation," and should prevent any substantial outbreak.

The smallpox warning could affect thousands of travelers, with some countries—particularly Mediterranean resort areas—likely to make vaccination obligatory. France, however, said today that it would not require certificates of vaccination.

Some airlines were advising passengers to get injections from their own doctors, rather than depending upon the limited resources of London's airports.

French Student Unrest Over Draft Continues

STRASBOURG, April 5 (Reuters).—Students occupied the universities in Strasbourg, Bordeaux, Montpellier, Tours and Caen while Parisian students went on strike today, continuing protests against a government decision to lift their deferments and make them liable for military service.

The students went ahead with their demonstrations despite the government's announcement yesterday that, in view of the unrest it had provoked, parliament will re-examine last month's decision to revoke students' military-service deferments.

U.S. Aides Foresee Airlift

Imminent Cambodia Fall Doubted

By John W. Finney

WASHINGTON, April 5 (NYT).—Two top Pentagon officials said yesterday they foresaw no immediate military defeat of the Cambodian government, but held out the possibility that the United States would have to mount an airlift to the besieged capital of Phnom Penh.

This guarded assessment was offered by Defense Secretary Elliot L. Richardson and Adm. Thomas G. Moorer, chairman of the Joint Chiefs of Staff, as administration officials watched with mounting concern what they privately described as a "deteriorating" military situation in Cambodia. All the supply routes to Phnom Penh have been cut off by Communist-led insurgent forces.

Mr. Richardson said that if the "situation becomes dire enough," the United States may have to airlift supplies and military equipment to the government forces defending the Cambodian capital.

For the moment, however, Mr. Richardson said priority was being given to reopening the roads and waterways leading into Phnom Penh, where the Cambodian parliament voted yesterday to extend the "state of danger" proclaimed nearly a month ago by President Lon Nol.

Short Supply

All seven roads, as well as the Mekong River water route leading into Phnom Penh, have been severed in recent days, leaving the Cambodian capital with reportedly less than five days' supply of gasoline.

Mr. Richardson and Adm. Moorer were questioned about the Cambodian military situation by reporters following an appearance before the House Appropriations Subcommittee on Defense.

Asked whether he saw any evidence of collapse of the Lon Nol government as a result of the Communist military pressure, Adm. Moorer replied: "I do not see any immediate threat of total collapse."

Noting that the Communist guerrilla forces in the past have periodically cut off the lines of communication leading into Phnom Penh only to have them reopened by government forces, Adm. Moorer said, "I think the fighting of this nature will continue."

As the military situation has deteriorated over the last month, the United States has intensified its bombing in Cambodia of North Vietnamese supply lines and enemy troop concentrations.

Political Considerations

Officially, the administration continued to maintain its secrecy about the extent of the American air operations in Cambodia, a secrecy that defense officials suggested was based more on political than military considerations. Mr. Richardson argued Tuesday that information on the bombing could not be made public because "possible advantage might be taken of it by the other side."

Privately, however, defense officials reported that about 60 B-52 bombers and 150 tactical fighter-bombers had been operating daily over Cambodia for the last few weeks. This represented an increase in bombing activity, which defense officials said accompanied a step-up in Communist military actions in Cambodia in the last month.

At the outset, the B-52 bombers, according to officials, were used primarily to attack North Vietnamese supply routes and bases in northeastern Cambodia and along the border of South Vietnam. But increasingly, officials said, the bombers, which lay down a saturation pattern of bombs, have been used to attack base camps and troop concentrations of the insurgent Cambodian forces that at this point present the main military challenge to the Phnom Penh government.

While Communist insurgent forces presented the main military threat around Phnom Penh, officials said some fighting to the south of the Cambodian capital involved regular North Vietnamese units seeking to protect their supply corridors leading into the Mekong Delta area in South Vietnam.

U.S. Troops Unlikely

Mr. Richardson said he could not foresee the possibility of the military situation becoming so grave in Cambodia as to require the reintroduction of American ground troops. An amendment to a foreign aid bill passed by Congress in 1970, after the American "incursion" into Cambodia, specifically prohibits the reintroduction of American ground troops or advisers into Cambodia and provides that military aid to that country does not represent a commitment to assist in the defense of Cambodia.

Administration officials continued to emphasize that the purpose of the bombing was to pressure the Communist side into agreeing to a cease-fire in Cambodia called for in the Paris peace agreement on Vietnam. From Mr. Richardson and other officials there were hints that the bombing was being accompanied by secret diplomatic efforts to prevail upon North Vietnam to use its influence to achieve a cease-fire in Cambodia.

Convoy on Mekong

PHNOM PENH, April 5 (Reuters).—A supply convoy under American air cover was sailing up the Mekong River tonight to try to break through Communist lines with fuel, food and military equipment.

As the convoy of about a dozen freighters and tankers headed up the South Vietnamese stretch of the Mekong toward the border, Cambodian forces were fighting Communists on every supply route to the capital.

The biggest government effort has been along the Mekong shipping route, closed for nine days. But despite the recapture of a four-mile section of the river bank, most of the Mekong south of Phnom Penh remains in Communist hands.

The critical time for the supply convoy will come tomorrow night when it crosses into Cambodian territory, military sources said. It is due to arrive in Phnom Penh on Saturday.

Meanwhile, field reports said that Communist troops on the Mekong River's east bank today ambushed three Cambodian gunboats carrying ammunition, sinking one vessel and damaging two.

In a similar ambush yesterday two naval barges taking reinforcements to Neak Luong were hit by Communist shells which killed 40 and wounded many others, military sources said.

Final Offensive

PARIS, April 5 (UPI).—Communist-led Cambodian forces have launched a final offensive to overthrow the U.S.-backed Cambodian government, a spokesman for the exiled leader, Prince Norodom Sihanouk, said today.

"The arch-rotten Lon Nol regime is being routed," said spokesman Chau Seng.

"Our forces have launched the decisive and ultimate offensive which will lead to a complete and early victory," he said.

Six Ex-POWs Say Torture Forced Anti-War Statements

By Karlyn Barker

ANDREWS AIR FORCE BASE, Md., April 5 (WP).—When the beating started, Air Force Col. Thomas H. Kirk, who had been sitting on a stool unshaven and unwashed for 10 days, could resist his North Vietnamese captors no longer, he said after his return home.

"I snapped my cork," said Col. Kirk, 44. "I rolled up into a fetal position and cried like a baby. When they asked me if I'd make the tape [for broadcast], I said 'Yes, yes, yes.'"

Col. Kirk was one of six Air Force POWs who held a news conference here yesterday. The men, all of whom were released in Hanoi on March 14, described how they were tortured and broken down by physical and mental abuse until many made anti-war statements.

"The North Vietnamese can do these things [force compliance] in a relatively short time," said Col. Kirk, who told how he was made to sit on a stool for days at a time.

"That may not sound very hard, but when you have to sit there for seven days and seven nights with no shaving and no washing, I guarantee it's pretty much of a strain," he said. During a second session with his captors, Col. Kirk said, he had to sit on a stool 10 days.

The Air Force officer, a prisoner since October, 1967, said a guard would come in and shake him every five minutes so that he couldn't sleep. When one guard "jabbed me in the face with a bamboo stick, I lost my cool and pushed him."

For that, Col. Kirk said, the commander allowed the guard to beat him. During the beating, Col. Kirk said, "I snapped my cork. I rolled up in a fetal position and cried like a baby. When they asked if I'd make the tape, I said 'Yes, yes, yes.'"

The men said that throughout their captivity they tried to maintain military order.

Capt. Arthur T. Hoffson said when he was captured in August, 1968, he was kept for three months "in the southern panhandle of North Vietnam and forced to sit in a three-foot-deep hole."

Capt. Hoffson, 29, said groups of peasants would "troop through. They threw stones, spit, taking their vengeance out on me."

Capt. Howard J. Hill, 30, said that, of the whole experience, "the only thing I'll never forget or forgive is that in the five years and three months I was a prisoner, the North Vietnamese only let me have one letter from my wife, and that was not until last September."

The news conference was one of many being held around the nation by small groups of former POWs.

Col. Kirk said actress Jane Fonda "was duped" by Communist propaganda. He said he would let Americans decide "whether the 480 of us were lying [about the torture] or whether she is misinformed." He suggested that she and other anti-war radicals be given "a one-way ticket to Hanoi and let them join the happy society of the North Vietnamese."

Tortured After Life Saved

JACKSONVILLE, Fla., April 5 (AP).—A former prisoner of war, Navy Lt. Comdr. John S. McCain 3d, said yesterday that his North Vietnamese captors both saved his life and tortured him after they learned his father was an admiral destined to become commander of U.S. forces in the Pacific.

"My leg was broken and I had other injuries when I was shot down," Lt. Comdr. McCain, who was captured in October, 1967, said at a news conference. "After four days with no medical treatment whatever . . . I realized I was dying.

"One of my 'dear friends' we called 'the Bug' came in and brought a doctor. I asked, 'Are you going to take me to the hospital?' and they said, 'Too late, too late.'"

But a short time later, Lt. Comdr. McCain said, the prison guard came back and said, "Your father is big admiral."

After he was taken to a hospital, Lt. Comdr. McCain said, his treatment was good for a while, but deteriorated again when the North Vietnamese tried to use propaganda to take advantage of his father's position.

"In mid-1968, a man in charge of all the camps tried to get me to accept release," Lt. Comdr. McCain said. "I didn't know at the time that it coincided with my father's appointment as commander in the Pacific. When I refused to take release ahead of Comdr. Alvarez and the others who'd been there longer, the treatment became very bad."

Lt. Comdr. Everett Alvarez Jr. was the first American POW in North Vietnam.

Lt. Comdr. McCain said his leg was rebroken, his teeth smashed, one arm broken and various other injuries inflicted in a series of torture sessions and almost constant solitary confinement until early 1970.

UPI.

TELLS OF TORTURE—Comdr. Paul Schultz demonstrating how, he said, a 8-inch steel rod was forced into his mouth during questioning by North Vietnamese captors. He said at a news conference in San Diego that the rod dislocated his jaw and split his lips.

Cabin Crew Of BOAC Stage Strike for Sex

LONDON, April 5 (AP).—British Overseas Airways Corp. cabin stewards and hostesses struck for three hours at London Airport today to protest "nightmarish" duty schedules they claim are ruining their love lives.

The airline said seven international flights were delayed by the stoppage, which lasted until noon.

Cabin staff said BOAC had refused to give them a month's notice of working schedules instead of the present 17 days. They are also angered by BOAC's emergency 12-hour standby system, which they say often forces them to cancel dates and parties. "I couldn't tell you how many theater tickets I've canceled—and it can be ruinous to your sex life," one hostess said.

...ure Boycotters Back

...eat-Price Cuts Announced ... U.S. Supermarket Chain

... YORK, April 5 (AP).—...or supermarket chain, feel... ...e pressure of a five-day... ...at boycott, announced to... ... would reduce prices on ...ork, lamb and veal in an ... to lure consumers back to ...ounters.

...les G. Rodmon, president ... Grand Union Chain, said ...w York that the prices ...be cut to at least 10 cents ...d below the federal ceil... ...et last week by President ... Veal was not included by ...esident in the price ceil...

...rade publication, Super...ing Magazine, said Grand ...was the first big chain to ...rices. The chain, ranked ... the nation, had $1.38 bil... ... sales in the one-year ...ending March 3.

...odmon said the move had ...under consideration for ...ime, but added that the ...triggered the decision ... to take this action." He said the cuts, to begin tomorrow, were intended to "attract customers to our stores" and added it was hoped "this will quickly re-establish an adequate flow of meat from farm to table."

Not the Answer

He added that he felt a lengthy boycott or a government-imposed rollback of meat prices would be self-defeating because it would discourage production and eventually lead to even higher meat prices.

There was no immediate comment from other major chains on whether they intended to follow suit. So far, retail prices have been generally unaffected by the boycott.

Meat sales, however, continued to show a severe decline, ranging up to a 40 percent drop for some grocers and to 70 percent at some packing houses.

"We butchers are keeping each other company out here," said J. Luther Hinds, owner of Hinds Meats in Los Angeles. "Over-the-counter business is down 30 to 40 percent."

Another butcher, Les Whisenbut, agreed with Mr. Hinds, saying, "Our market is like a ghost town."

Frank Register, executive director of the National Association of Retail Grocers, said his organization has been making spot checks since the boycott began, and meat sales nationwide are down 40 percent.

Harold Benninger, head of meat cutters' Local 421, said in Los Angeles that meat cutters are "being made the sacrificial lambs in the battle of the housewives to lower prices." He said that some 5,000 meat industry workers in the Los Angeles area are without jobs. Most southern California packers say they have laid off about 15 to 20 percent of their work force. Reports from retail outlets vary, but most estimate layoffs at about 30 percent.

In many areas, the price of fish rose as demand for fish increased. A major New York City fish dealer reported a 10 percent price rise in one day.

...Air Force Jails, Fines, Drums Out Anti-War Officer

DAYTON, Ohio, April 5 (AP). —An Air Force officer who refused to practice medicine because of his pacifist beliefs was convicted yesterday by a court-martial of failure to obey orders.

Lt. Bruce Ashley was discharged from the service, sentenced to 1-1/2 years at hard labor and fined $25,000.

Lt. Ashley, 26, had defied orders twice, saying he was protesting the Vietnam war. He maintained that to practice medicine at Wright-Patterson Air Force Base would violate his pacifist beliefs as a Quaker.

He was charged with refusing to participate in a military drug abuse program, and refusing to carry out his duties reviewing clinical records.

The former officer twice applied for military discharge as a conscientious objector, and was refused twice.

Bad Weather Hits Italy for 3d Day

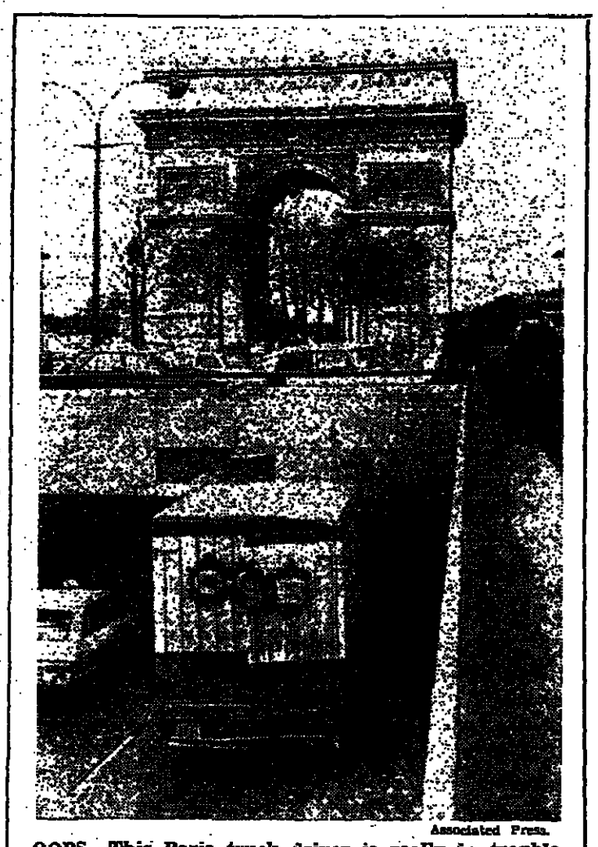

ROME, April 5 (AP).—Snowstorms, gale-force winds and driving rain lashed much of Italy from the Alps to Sicily for the third day in a row today in a spell of wintry weather which sent the temperature below freezing in various southern areas.

For Sicily, it was the culmination of one of the worst winters the island has had in many decades. The Sicilians, who used to celebrate rare snow by walking on it with bare feet, have had more of it than have many Alpine areas this year.

Rainstorms triggered scores of landslides in the southern regions of Calabria and Lucania, and three persons were reported missing in a snowstorm which hit the Umbrian Apennine region.

Artificial Heart Fails

SALT LAKE CITY, April 5 (UPI).—Bruce, the calf who set a record living with an artificial heart, died today 452 hours after the device was implanted. The device, developed by Dr. Willem Kolff of the University of Utah, was implanted in the 12-week-old animal March 16.

Associated Press.

OOPS—This Paris truck driver is really in trouble. Double trouble. Not only did he not realize his truck was too big to go through the underpass, but trucks are forbidden from using the Champs Elysées, and that's where the accident happened.

$268-Billion Spending Limit

Senate Votes to Require Nixon To Use Funds Appropriated

By James M. Naughton

WASHINGTON, April 5 (NYT). —The Senate voted today to set a $268-billion spending limit in the next budget year and to insist that President Nixon adhere to the spending priorities set by Congress.

By a roll-call vote of 70 to 24 the Senate demanded that the President obtain congressional approval each time he attempts to cut back on a federal spending program.

At the same time, in an effort to demonstrate awareness of the need for spending restraint, the Senate agreed, 88 to 6, to adopt a spending ceiling—$700 million below the amount asked by the President—for the fiscal year beginning July 1.

The spending ceiling, proposed by Sen. Edmund S. Muskie, D., Maine, and the curb on presidential cuts in spending programs, offered by Sen. Sam J. Ervin Jr., D., N.C., were attached to a bill that would give congressional approval to the Feb. 13 devaluation of the dollar.

They face an uncertain fate in the House, which is considering spending legislation of its own, and the likelihood of a presidential veto before they become law.

The amendments adopted today represented the Senate's effort to re-claim congressional control over the spending process.

Sen. Walter F. Mondale, D., Minn., declared during the lengthy debate:

"If the President wants to meet us halfway, if the President wants to resolve what I regard as the most profound domestic constitutional crisis in the history of this nation, this is the way it should be done."

Points Approved

Sen. Ervin rallied conservative Democrats and Liberal Republicans into a coalition that approved the following:

- Spending during fiscal 1974 would be $268 billion, that is, $700 million below the ceiling urged by Mr. Nixon.
- To remain within the ceiling, the President could cut back spending, but only by reducing each budget subfunction—such as "military personnel" or "law enforcement"—by the same proportion.
- For any other effort to impound or withhold appropriated funds, the President would have to obtain approval of both houses of Congress within 60 days. If the resolution approving the impoundment has not been enacted within 60 days, the President will be compelled to spend the money.
- Congress could also adopt a concurrent resolution, any time during the 60-day impoundment, to specifically refuse approval and thus order the money released immediately.

U.S. Recalls Mushrooms

WASHINGTON, April 5 (AP).—The Food and Drug Administration announced today that at least 800 cases of canned mushrooms sold to the Defense Department are being recalled because of deadly botulism contamination.

Nixon Sends Second Veto To Congress

WASHINGTON, April 5 (AP). —President Nixon today vetoed a bill that would require his administration to spend an estimated $120 million for rural water grants he ordered halted on Jan. 10.

In a veto message to the Congress, Mr. Nixon said the grant program would cause a "dangerous crack" in the "fiscal dam" his administration is constructing to hold back "a further flood of inflation or higher taxes."

The veto was Mr. Nixon's second of what he calls "inflationary, budget-breaking legislation" that Congress has sent him. His first veto, which the Senate sustained, involved authorization of funds for vocational rehabilitation of the handicapped.

House Votes Tuesday

Speaker Carl Albert, D., Okla., said the House will vote Tuesday on overriding the President's veto and said, "I think there is a chance that it will."

Mr. Nixon, in today's message, said the effort by Congress to revive the expenditure of funds for the rural water and waste disposal grants for communities with less than 10,000 population was "a disservice to the taxpayers . . . which I am not prepared to accept."

Mr. Nixon said the measure was "probably unconstitutional" and raised the question of whether the Congress can mandate that the President spend the full amount it appropriated.

He said he had been advised by Attorney General Richard G. Kleindienst that "such a mandate conflicts with the allocation of executive power to the President" under the constitution.

Thus, Mr. Nixon said, "the bill is objectionable not only in its practical and economic aspects, but on the basic legal grounds as well."

U.S. Asks More Soviet Data To Justify Gas Field Project

By Hedrick Smith

MOSCOW, April 5 (NYT).—Henry Kearns, chairman of the United States Export-Import Bank, indicated yesterday that he had told high Soviet officials that Moscow would have to give Washington more facts if it hopes to obtain huge American credits for joint development of Siberian natural gas.

Historically, the Soviet Union has kept information on its foreign-exchange reserves highly secret and recently it has rejected inquiries from American concerns asking to have their own specialists verify Soviet claims of huge natural gas reserves in western Siberia.

Mr. Kearns, who has been meeting this week with Premier Alexei N. Kosygin and other top officials, said at a news conference in the American Embassy that the Export-Import Bank normally requires such basic financial and resource information in preparing to extend major credits.

"We do business with 140 countries," he went on. "We use the same principles with anybody. It would be no special requirement for the Soviet Union. But I think we should require the same thing from the Soviet Union as from anyone else."

The Law and Congress

Other officials confirmed that Mr. Kearns had told his Soviet counterparts that the Export-Import Bank was required by law and congressional mandate to have such information before granting large credits.

An American consortium is interested in a long-term arrangement expected to cost roughly $3 billion in American investments to tap Soviet natural gas reserves in western Siberia. Moscow would pay off the loans with shipments of liquefied natural gas in years to come.

The White House is withholding a go-ahead for a major feasibility study on the project while it examines the deal's national security implications and other aspects.

Following the Export-Import Bank's decision on March 21 to grant Moscow about $104 million in credits for more modest projects, the Soviet press has produced a series of optimistic articles about the prospects for future cooperation, including joint development of Soviet natural gas and other natural resources.

General Discussion

Mr. Kearns said that he had not come here to negotiate any new credits but to conduct general discussions on how the Soviet and American financial systems could be meshed.

He said he had explained that while his bank does not have to seek specific approval from Congress for its loans, "we would be largely influenced by the attitude of Congress because if we don't pay attention to them, then we lose our authorization in general."

He was alluding to congressional pressures for a more liberal Soviet emigration policy, especially for its Jewish citizens.

Makarios-Grivas Conflict Leads To Fatal Shooting

NICOSIA, Cyprus, April 5 (AP). —The conflict between President Makarios and the pro-Enosis underground of Gen. George Grivas claimed its first fatality last night when a Makarios supporter was shot dead in the south-coast port of Larnaca.

The dead man, George Photiou, was reportedly a prominent supporter of Archbishop Makarios and an outspoken opponent of Gen. Grivas. Official sources said there was no doubt the murder was political.

Mr. Photiou was shot down by two men with submachine guns while driving his car in the heart of Larnaca.

He owned a filling station which had a bomb thrown at it last week.

Last night two cars belonging to Grivas supporters were blown up at Larnaca, and last Sunday another explosion wrecked a bar, used as a meeting place by Grivas supporters.

Customs Officials In Italy Threaten To Extend Strike

MILAN, April 5 (AP).—Italian customs inspectors, whose 12-day strike, scheduled to end on Sunday, has blocked hundreds of trucks and train cars at border points, threatened to start another walkout next week if the government does not accept their demands.

The announcement came amid mounting complaints by Italian shippers that the blockade of frontiers was disrupting the Italian economy.

"Dozens of firms are close to a shutdown for lack of raw material stopped at the frontiers," said Arturo Lucarelli, secretary of the National Shippers Association. "We must also consider that tons of goods are perishable, causing damage of millions of dollars daily."

The government decision last weekend to replace the 5,000 striking inspectors with customs police officers gave little relief to shippers because "transit documents signed by customs officers will not be regularized once the strike is over," Mr. Lucarelli said.

The strikers are protesting an agreement between the government and nationwide unions which would deprive them of some privileges in a realignment of civil servants' benefits.

A spokesman for the association of customs inspectors said the new strike, possibly to be called next week, could last 18 days.

Burma Premier Married

RANGOON, April 5 (Reuters). —Burma's Premier Ne Win, 61, was married yesterday to Ni Ni Myint, a history tutor at Rangoon University. The premier, who took over in a bloodless army coup d'état in 1962, was widowed last Sept. 30 when his wife died in a London hospital.

U.S. Seeking New Course With Albania

By Bernard Gwertzman

WASHINGTON, April 5 (NYT). —The United States called today for an end to the long-standing chill in relations with Albania as part of a more vigorous American effort to improve ties with all the Communist governments of Eastern Europe.

The offer to begin a dialogue with Albania, a country with which Washington has no diplomatic relations, was made in a policy address delivered last night at the Naval Academy in Annapolis, Md., by Deputy Secretary of State Kenneth Rush.

After listing steps either taken or foreseen to improve relations with the rest of Eastern Europe, Mr. Rush said, "Only with Albania has there been no visible progress."

"In light of our expanding ties with all other countries in Eastern Europe," he said, "it seems anachronistic that Albania should continue to wish to function in such isolation. Albania still speaks of us in the contentious rhetoric of an earlier era. Whether it wishes to resume relations, we do not know. If and when it does, it will find us prepared to respond."

A high State Department official said that the references to Albania were carefully worded and were meant to elicit a response from the Albanian government. Albania regards China as its closest ally, and consistently denounces the United States and the Soviet Union.

No Indications Yet

The official said that Albania so far had not indicated any particular interest in relations with Washington, but some other officials believe it might soon do so. They noted that in the last three years, Albania had established ties with virtually all of Western Europe and now has representatives in 56 countries.

Mr. Rush's speech was the first in many years by a high administration official that was devoted entirely to Eastern Europe. It seemed aimed not only at signaling Eastern European governments about the higher priority being given that area in Washington, but also at informing the American public about the more cordial relations developing between the United States and Eastern Europe.

The United States had relations with Albania, a tiny country on the Adriatic Sea north of Greece and west of Yugoslavia, until Italy occupied and annexed it in 1939.

After World War II, when a Communist government headed by Enver Hoxha took over, the United States never resumed relations. Because of sharp differences, Albania and Russia broke relations in 1961 and, since then, Albania has looked to China for its main support while increasing ties with other states.

The United States also has no diplomatic relations with the Communist governments of Cuba, East Germany, Mongolia, North Korea, North Vietnam and China, although liaison missions are being opened in Peking and Washington soon.

High Policeman In Italy Shot, Seriously Hurt

ROME, April 5 (Reuters).—A senior officer of the Rome criminal police squad, long involved in anti-Mafia investigations, was shot and seriously wounded outside his home here tonight.

The officer, 53-year-old Angelo Mangano, was shot by unidentified men who fired five pistol shots at him from a car, wounding him and his police driver.

Mr. Mangano's wife, who was with him at the time, was unhurt. Hospital sources said Mr. Mangano had been hit by four bullets, one of which seriously wounded him in the head. He was undergoing surgery, and the sources said that doctors thought they could save his life.

Mr. Mangano was assigned for several years to investigations of the Mafia, particularly to the hunt for one of Italy's most wanted men, Luciano Liggio, allegedly a Mafia "executioner."

Since last year, he has been assigned to security duties at the Interior Ministry.

...ır Witness Won't Testify at the Pentagon Papers Trial

Sanford J. Ungar

...ANGELES, April 5 (WP). ...rmer South Vietnamese ...t flown here from West ... to be a star defense wit... ... the Pentagon papers trial ...vn yesterday without giv... ...ord of testimony.

...an Thai, once Saigon's am... ...r to Washington and now ...cial of the United Nations ...ment program in Dakar, ..., had been secretly ...ed as a witness for Daniel ... and Anthony J. Russo jr., ...e charged with conspiracy, ...ge and theft of govern... ...roperty in disclosure of the ...ret documents.

...Thai's testimony was ex... ... to provoke a good deal of ...on, since he is named as a co-conspirator—but not formally charged with any crime—in the indictment against Mr. Ellsberg and Mr. Russo.

The government contends that he was present, and had illegal access to at least one volume of the Pentagon papers, while the defendants duplicated the documents at a Hollywood advertising agency in October, 1969.

Waiting for Dinner

According to sources close to the defense, he was to testify that he spent only half an hour with Mr. Ellsberg and Mr. Russo at the advertising agency while he was waiting to have dinner with them.

Another plan was to add him to the long list of witnesses who have testified that disclosure of the papers in 1969 could not have injured the U.S. national defense or given advantage to a foreign nation.

After extensive discussions with Mr. Thai—a long-time friend and confidant of Mr. Ellsberg from the days when they were both working at the Rand Corp., in nearby Santa Monica—the defense decided that his appearance as a witness could pose serious risks to its case.

It was feared, for example, that his testimony would serve only to highlight the theft charges against Mr. Ellsberg and Mr. Russo generally regarded as the strongest part of the government's case.

Tiger Cages Discoverer

Instead, Donald S. Luce, former Vietnam director of international voluntary services and the man who discovered the Saigon government's "tiger cages" for political prisoners on Con Son Island in 1970, was put on the witness stand yesterday morning with virtually no advance preparation.

Rubbing his eyes and sounding groggy—he arrived here from Washington late Tuesday—Mr. Luce testified about a volume of the papers describing "political repression" under the late South Vietnamese President Ngo Dinh Diem, who was overthrown in 1963 with American assistance.

The defense served notice on U.S. District Court Judge W. Matt Byrne jr. yesterday that its lengthy case will be completed by the end of next week. Both Mr. Ellsberg and Mr. Russo are expected to testify in their own defense before that time.

The Use of Compromise

The Senate has offered a compromise on the question of the respective powers of the executive and Congress in the spending of the people's money. In its present form, it is not a very good compromise, from the standpoint of the administration, since it confines the ceiling on congressional appropriations to an expression of intent, while placing statutory limits on the President's power to impound those appropriations. Nevertheless, as an effort at adjusting the balance between Mr. Nixon's efforts to hold down the budget and the constitutional power of the purse, vested in Congress, it can be applauded.

Compromise is not in very good odor in a time when the pursuit of absolutes is used to justify all manner of "strong" measures from bombings by fleets of B-52s to bombing by urban guerrillas. Yet in fact, the world runs on compromise, as even the Marxist dialectic admits in theory, however uncompromising Marxists may try to be in practice. And in the case of the powers vested in the executive, legislative and judicial branches of government under the U.S. Constitution, compromise is essential if the system is to work at all.

In the present instance, Mr. Nixon has taken his stand on the basis of the need to keep government spending within certain limits in order to prevent inflation and avoid the need for additional taxation. His own budgetary expectations are very large, and cannot be met with present revenues; they include substantial spending in areas of human welfare. The congressional majority advocates greater amounts in those domestic areas, and would cut down, if at all, in expenditures for defense and foreign aid.

The President has the practical advantage of possessing a policy-making apparatus: Congress has a tendency to view items of spending as they arise, which can make for an agglomeration of appropriations that may be individually appealing but in the mass only add to the deficit. It may be suspected, in fact, that representatives and senators vote for such appropriations in the expectation that the President will veto them. He will then bear the onus of rejecting programs that have a warm, humanitarian ring, while the congressmen can tell their districts they tried but were frustrated by the executive branch. This is a reverse twist on the late President Truman's technique of proposing what he knew would be turned down by Congress—and then calling the Congress a "do-nothing" body.

In such a process, however, vital national interests may be sacrificed, and the constitutional question only further logs the urgent issues. It is incumbent upon both the President and the leaders of Congress to reach some rapport on major issues, some compromise on their respective roles. There is a good deal of drama when rhetoric rolls up and down Pennsylvania Avenue between the Congress and the White House, but a nation of more than 200 million people cannot subsist on words, nor be governed by a succession of confrontations.

'The Trouble With This Country Is Too Much Permissiveness.'

Vigorous Reactions

Presidents Nixon and Thieu are agreed on the need for "appropriate vigorous reactions" to continuing violations of the cease-fire agreements by North Vietnam. But the question remains whether President Nixon was appropriately vigorous in reacting also to the continuing violations of the truce terms by President Thieu.

Fighting is raging in South Vietnam, sometimes as intensely as it was before "peace" was declared. Is this solely due to Hanoi's perfidy? Reports from the area make it clear that Saigon—as well as Hanoi—has initiated many of the engagements. Violation of Article 10 of the Paris accords must be just as legitimately a source of concern to the Vietnamese Communists as the equally illegal buildup of North Vietnamese forces is to the Saigon government.

Washington claims that Hanoi is also violating Article 20, which bars military activities by foreign countries in Cambodia and Laos. But U.S. bombers also continue to carry on military activities in Cambodia.

There is a ping-pong character to these violations. They go back and forth; each response brings its counter-response. Each side gets away with what it can. It was good to read, in the San Clemente communiqué, of President Nixon's assertion that "The United States views violations of any provisions of the agreement with great and continuing concern."

Pointedly enough, President Thieu did not join in the sentiment of that paragraph; but this concern should surely have been conveyed to him in terms far more blunt and ominous than official niceties would permit in a public diplomatic communiqué.

THE NEW YORK TIMES.

This Is the War That Was

By C. L. Sulzberger

SAIGON.—On July 19, 1941, Admiral Leahy, ambassador to Vichy, France, transmitted this message from President Roosevelt: "If Japan was the winner (in World War II), the Japanese would take over French Indochina; and if the Allies won, we would." In that psychology lay the root of future trouble.

I have been visiting this tormented country intermittently for almost 25 years and all the time it was suffering violence. In the early 1950s, when Viet Minh mortars thudded each evening along the Saigon river and German was spoken in Tourane, now Da Nang, by ex-Nazi recruits of France's Foreign Legion, war was already an established habit.

The French quit after Dien Bien Phu and the United States moved in, spending $140 billion in a gradually increasing effort to protect what was left after the Geneva partition. And now, with the Americans gone, Vietnam is in a period of neither war nor peace. What has been learned from this expensive effort?

Views of Marcos

President Marcos of the Philippines assays Vietnam accordingly: "Had the principles of self-determination and decolonialization been observed by France and the United States, there would have been no war. Now the United States and the world have relearned this lesson.

"It has been shown to be unprofitable to fight ideological wars. One also sees it is more practical to fight exported wars by proxy. Finally, the whole world gained time; but no one knows if this time has been used to advantage."

The 1954 partition, arranged as a temporary device and reaffirmed by this war's cease-fire, theoretically remains in effect. With South Vietnam's integrity officially guaranteed, President Nixon could withdraw American forces and claim peace "with honor"—which would be true if South Vietnam could assert its independence henceforth. To be or not to be, that is the question.

There is no compelling argument against partition. During the 17th and 18th centuries, Vietnam was divided along almost the same frontier. American intentions in going to war were honorable even if the drift into a widening conflict was unforeseen.

Thieu Is Gaining

President Thieu is politically strong today and could surely win an election. His opponents therefore wish to delay its prospect. The latest agrarian and tax reforms constitute a revolution for Vietnam and Thieu is gaining in rural areas. The Viet Cong is weak. There would be no problem without the redoubtable North Vietnamese Army—which Hanoi blandly insists never fought here.

But the war was surely not won. In 1967, Ambassador Bunker recommended a thrust into southern Laos cutting off the Ho Chi Minh Trail so Communist forces to the South would wither away. Washington vetoed the idea as violating the Geneva accord (which Hanoi constantly violated); as a provocation of China (which wasn't threatened); and as requiring more U.S. divisions (which came later anyway).

America never fought to win. Nor did it make adequate efforts to engage the U.S. people in a sense of participation. The burden fell unfairly on the young who didn't understand its background and whose views spread widely.

At the start, the Americans were too know-it-all while their enemy was tough and idealistic. Saigon was never fully engaged; there wasn't even a mobilization law until 1963. While young Americans fought, young South Vietnamese were exempted. Vietnamization began too late.

Washington, furthermore, believed it could apply pressure, then break off and expect concessions. Time and again it was fooled until the unexpected Nixon toughness, which produced the chance of settlement, if not its actuality, and a way out for Americans.

Thieu has done foolish, vindictive things. But it is silly to equate his semidictatorship with Hanoi's totalitarian system. The South Vietnamese Army is still riddled with influence-promotions but it is better than it ever was.

South Vietnam is dependent upon American logistics and maintenance for its aircraft, helicopters and armor. But if the United States continues to supply this force, Saigon seems unlikely to succumb.

Ideologically, the United States has grown up in Vietnam and now sees that Communism is not a Manichean evil automatically to be opposed and that represented democracy isn't always a realistic export. American strategy has been reformed. It is hard to imagine another ground war in Asia involving U.S. troops.

We have learned to mind our business better, but our adversaries have also learned not to trick us, as Hanoi found out by unexpected bombings. Moreover, Moscow and Peking have become mutually even more hostile. This then, in the moment's relative quiet—and what is tranquil in Vietnam is noisy elsewhere—is the war that was.

Misadventures on Chile

Harold S. Geneen, chairman of the International Telephone and Telegraph Corp., maintains in testimony before a Senate foreign relations subcommittee that the giant firm he heads "did not take any steps to block the election of Salvador Allende as president of Chile" and that an ITT director "did not offer to contribute anything to the CIA," in talks with Richard Helms, then director of the intelligence agency, and with Henry A. Kissinger in the White House in September of 1970.

But that ITT director, John A. McCone, told the subcommittee on March 21 that Mr. Geneen had instructed him to inform Mr. Helms and Mr. Kissinger that the corporation was ready to contribute a million dollars or more "in support of any government plan for bringing about a coalition of opposition to Allende."

Mr. Geneen insists that all ITT did after the Allende government took over its Chilean subsidiary in 1971 was "to present its views, concerns and ideas" to various government departments in Washington. This, he said, was "not only ITT's constitutional right but also its obligation."

But William R. Merriam, an ITT vice-president, sent a letter and an "action" memorandum to a White House economic adviser in October 1971 with an 18-point plan for economic action to insure that Allende does not get through the next six months.

Mr. McCone's testimony and Mr. Merriam's letter and memorandum could seriously jeopardize ITT's claim for $92.5 million in compensation from the U.S. government's Overseas Private Investment Corp for the seizure of its Chilean properties. But the CIA has also been severely tarnished in testimony before the subcommittee, chaired by Sen. Frank Church.

By making its own proposal to ITT for waging economic war against Chile and thus, it hoped, persuading the Chilean Congress to reject Mr. Allende in 1970, the CIA went wildly beyond any legitimate intelligence function and also disclosed incredible ignorance and naïveté about Chile's political situation.

If a State Department witness is correct in insisting that the official U.S. policy toward Chile, before and after Mr. Allende's election, was one of "nonintervention," it is evident that the CIA once again was conducting its own foreign policy, "going off on a frolic of its own," as Sen. Fulbright suggested, and raising anew the question whether there are effective controls over its agents and activities.

The close, confidential links between the corporate giant and the intelligence agency were unquestionably facilitated in this case by the kind of unhealthy relationship that ought to be barred by policy if not by law. Mr. McCone, who says he took the million-dollar offer to the CIA and White House, was Mr. Helms's predecessor as head of the intelligence agency and still serves as consultant to it.

In their schemes to block the election of a Marxist president in Chile, both the CIA and ITT badly damaged the best interests of the United States.

THE NEW YORK TIMES.

Letters

Watergate

Obviously, to those who number themselves among certain elites, the danger in fully opening the sluices of a Watergate is that there are "masses" who may become aware of the muddy waters that have long been flowing on the other side.

Those elitists who so recently sailed so patronizingly and obliviously back and forth over the polluted currents which they apparently thought were effectively contained thus see their positions threatened by a possible shift in the tide of power's prerogatives.

Naturally, then, extraordinary efforts are being made by those who have vested interests in controlling the Watergate to limit the amount of "seepage" through the sluices: while the "ignorant," who, in a democracy, are ostensibly entitled to be informed of, and participate in, matters that may affect them, continue to try to wrench them fully open.

As has been demonstrated in the recent history of nations whose power wielders sanctimoniously cloaked their questionable acts in a mantle of doubtful "executive privilege," the malady of internal upheaval was the inevitable result, and, alas, to the discomfort—to say the least!—of the "ignorant"-innocent, release and complete catharsis proved to be the only cure.

French View Faulted

This is in response to an anonymous French social worker who was quoted in the article "France's Need for Foreign Workers" (IHT, April 2) in which he stated "...but our government is lucky that foreigners don't vote. After all, they're our equivalent of America's blacks and Puerto Ricans." This remark not only reflects the stupidity on the part of the social worker, but shows that he is obviously in need of some social aid himself. The comparison between foreign workers in France and American blacks was not only irrelevant, but absolutely preposterous!

JANYCE BOLDEN.

Paris.

In the International Edition

Seventy-Five Years Ago

April 6, 1898

NEW YORK—President McKinley's message will go to Congress at noon tomorrow. The cabinet discussed it at length last night. It is as strong as anyone could wish. It contains a vigorous arraignment of Spain's dealings with Cuba, asserts that Spain is palpably unable to end the war there and, while not recognizing the independence of the insurgents, intimates that the time has come for the intervention of the United States by force, if necessary. The President does not tolerate European interference in American affairs and shuns the idea of mediation.

Fifty Years Ago

April 6, 1923

NEW YORK—Sir Arthur Conan Doyle, interviewed here on the death of Lord Carnarvon, said that an evil spirit or element, summoned by some Egyptian priests, might have induced the disorder which caused Lord Carnarvon's death. He declared that there are many previous instances of disasters to those concerned in disinterring mummies, and cited the case of the son of Sir William Ingram, who dug up a mummy and found an amulet with the inscription: "May the person who unwraps me die rapidly and his bones never be buried." He drowned in a flood shortly after this incident.

Letter From Soviet Georgia

Staggering Hospitality

By Robert G. Kaiser

TBILISI—A vacationing American came to Tbilisi last year with the phone number of a Georgian journalist. A friend in New York gave him the number and said the Georgian was a wonderful guy—look him up. Once installed in his hotel, the American called the journalist.

"What are you doing tonight?" the Georgian asked. "Nothing? Then stay right there. We'll pick you up in half an hour." The journalist and his wife appeared in a car, drove the American and his companion to a restaurant in the hills outside Tbilisi and ordered a Georgian banquet, including the requisite (i.e., large) amount of wine.

Hours later, as they prepared to leave the restaurant, the Georgian turned to his American guest. "I didn't understand you on the telephone," he said. "Who was it who gave you my telephone number?"

It's a true story, and a good description of the Georgians' legendary hospitality. Whether they treat each other as regally isn't clear, but the people of this southern Soviet republic welcome foreigners with staggering—often literally staggering—generosity.

Early Start

On a recent visit the hospitality began long before the foreigners reached Georgia itself—on the two-day train ride from Moscow. The foreigners emerged from their compartment on the first morning of the trip and were quickly swept into the compartment next door. There, at 9:30 a.m., friendly Georgians plied them with cold roastbeef, chicken, cheese, sausage, vodka and cognac, all in great quantity.

The next morning the Georgians insisted on going to the dining car for four bottles of local champagne (divided among four people). This was financed (at about $7 a bottle) by a man who had been in Moscow on business for two weeks. He pulled out his wallet and found it empty. Then he dug into a hidden compartment and ceremoniously produced two 50-ruble notes. "I put those there two weeks ago," he said. "It's my reserve fund."

Two nights later, one of the Georgians from the train hosted a big banquet at another restaurant in the hills around Tbilisi. The next morning, the foreigners struggled through a breakfast of fried eggs in the hotel buffet. The waiter put a fresh bottle of sparkling wine down in front of them.

"That's not for us, we didn't order it," one of the foreigners said. "It's for you," the waiter answered, nodding at two Georgians in a corner who grinned in greeting. Mercifully, they finished their breakfast and left before the visitors, so it was possible not to finish the wine without insulting its donors.

* * *

A tough new boss of the Communist party in Georgia is trying to discipline the relaxed people of this little nation, apparently with some success. But many old habits are unbreakable. "Y can't change Georgians," one them explained. "We like this pointing to his wine bottle, "a girls, and life . . ."

The new party boss has in posed new restrictions on trav to Moscow, and a trip to t capital now must be justifi with a good reason. Moscow h felt the change. Its farmers' ma kets, where peasants sell t produce from their legal priva plots, no longer offer the sele tion of Georgian fruits, vegetabl and flowers to which Muscovit long ago became accustomed.

Clusters of Georgians on dow town streetcorners, just hangi around, used to be a commo sight in Moscow. They've disa peared, too.

Busy Doing Nothing

Georgians seem to be inveta ate hangers-around, and the are hundreds of them busy doi nothing every day along Rust velli Avenue, Tbilisi's tree-lin main street. They chat, smo kiss and embrace an old frie who passes by, but they seem have no other calling in life.

The workers on Tbilisi's co struction projects appear to pu sue their work in a simila relaxed manner. On a visit he in late 1971, the concrete for of a new central telegraph buil ing was taking shape next to t main hotel. The same shell still there; it has progressed or slightly during 16 months. Tha as now, no workmen could seen working on the structure a weekday morning.

When will it be finished? don't know," answered a ta driver. "Probably in a coup of years."

* * *

The Georgians have a we spot for poetry, and probab honor their poets more than the old kings, who led them in defeat against an almost endle series of successful invaders. Th affection for poetry extends foreign works, like Shakespea One Georgian writer transla most of the great Shakespeare dramas into Georgian, and h translations are now regarded original works of art.

In Tbilisi University's Depar ment of Western Literature, Pr Nico Kiasashvili has establish a little Shakespeare center. Th hallway outside his office is lin with posters for Shakespeare productions, many from West Europe and America.

Kiasashvili has been to Str ford-on-Avon and to Stratfo Ontario, for international Shak speare symposia. He's also hel ing to organize the first natio symposium of Soviet Shakespea experts.

"All Georgians aren't busine men," the professor observed his office the other day. He r ferred to the Georgians' reput tion as fast operators—a lege in other parts of the Sovi Union, but not entirely credi in Prof. Kiasashvili's office, who shelves are filled with rare e tions of Shakespeare in Engli and Georgian.

Battle Over Oil From Alaska

By Joseph Kraft

WASHINGTON.—A rare insight into the future of national politics is provided by a bitter regional struggle which developed in the wake of the Supreme Court's recent nondecision in the Alaska pipeline case. Presidential aspirations and the drift of power from the East and North to the South and Southwest are both involved.

So are national security issues and relations with Canada and the Near East. So are the availability and price of gasoline, and the ongoing battle between the ecologists and the oil lobby.

Behind all this is the vast new oil find of the so-called North Slope of Alaska. A consortium of companies has developed plans to ship the crude across Alaska by pipeline and thence by tanker to the West Coast of the United States. That project has been approved by the Interior Department on behalf of the Nixon administration.

Decision Contested

But several environmental groups contested the administration's decision in the courts. Apart from raising ecological questions such as oil spill in the Pacific, the environmentalists argued that the project would violate the terms of the Minerals Leasing Act of 1920, which limits the width of the right of way that can be granted for the pipeline.

The lower courts, without even considering the environmental issues, ruled against the pipeline on the grounds that the project violated the 1920 law. Early this week, the Supreme Court threw the issue to the Congress by refusing to review the decision of the lower courts.

Congress can make the pipeline a reality by amending the 1920 act to accommodate a wider right of way for the pipeline. The administration favors that approach, as do most of the senators and representatives from the West Coast areas, which would benefit from the project. So do the oil companies who have lots of clout with congressmen and senators from the Southwest.

Leading the way for the Alaska pipeline is that doughty cold-war liberal and leading Democratic presidential aspirant, Sen. Henry M. Jackson of Washington. Sen. Jackson is chairman of the Interior Committee, and he is planning to bring out of committee the next few weeks a bill widening the rights of way.

He argues that only the Alaska pipeline provides a rapid way to exploit the new source of oil. He claims that keeping the pipeline in Alaska has important national security advantages.

But there is a rival project for exploiting the Alaska oil. It calls for bringing the oil south across Canada to the Midwest. It has been given new vitality by the partial nature of the recent Supreme Court decision.

Because the court did not rule on the ecological arguments against the Alaska pipeline, it appears that the project will be subject to a whole range of environmental and other suits, even if Sen. Jackson's bill is approved. The certainty of such legal action means long delay for the Alaska project. Given that prospect of delay in Alaska, a whole range of other considerations assert the advantage of the trans-Canada route.

Eases the Problem

It avoids the ecological problem of oil spills. It provides a richer source of supply since it will tap vast new Canadian fiel as well as the North Slo deposits.

It delivers oil where it is short supply, the Middle We and East Coast, rather than t West Coast, which is practical self-sufficient. It eases the n tional security problem by ma ing the most populous areas this country dependent for on Canada rather than the Ar states—an advantage that h been underlined since t Canadians, after a fit of n tionally inspired reluctance, a holding out the hand of cooper tion on oil.

The obvious merits of the tran Canada route have begun to a tract some potent congressio friends. Sen. Walter Monda the Minnesota Democrat w seems more and more to ha his eye on the presidency, preparing a bill mandating administration to negotiate a trans-Canada route. So is Jo Anderson, the Illinois congres man who is third-ranking Repu lican in the House.

The outcome of the fight impossible to predict. But t sense is that the East and Nor are going to be making a str fight before yielding pride place to the newer regions. the process, a lot of damage probably going to be done to Si Jackson's claim to stand abo local interests on environmen and national security issues.

Study by Florida Scientist

Cancer of Cervix in Women Linked to Male-Genital Virus

By Jane E. Brody

NOGALES, Ariz., April 5 (NYT).—A Florida scientist has ind that the male genital ct can harbor a virus that is spected of causing cancer of e cervix in women.

The scientist, Dr. Ysolina M. ntifanto, said that the virus, lled herpes type II, could be ried in the ejaculate and nsmitted from men to women ring sexual intercourse. She told the concluding session of the American Cancer Society's Science Writers Seminar here yesterday that her studies indicated that many men may carry the virus and not know it.

For a number of years this virus has been associated with cervical cancer, and it has been suspected—but not demonstrated—that it can be carried and transmitted by the male.

Dr. Centifanto said she had found the herpes virus in the genital tract of 15 percent of 363 randomly selected men, aged 15 to 85 and representing all socio-economic groups, who came to the University of Florida's urology clinic. None of the men had a history of having had an active herpes infection on their genital organs.

Closely Related

The genital herpes virus is closely related to the herpes simplex virus, which causes cold sores or fever blisters around the mouth. Genital herpes virus causes red, raised sores on the genital organs. The sores usually heal within 10 days. In women, the sores may occur internally, and four of five women with the infection do not know they have it.

Studies have shown that genital herpes is a venereally transmitted disease, like syphilis and gonorrhea, passed from person to person through intercourse.

In recent years, evidence gathered by researchers throughout the world has indicated that when the herpes virus infects women, it may not manifest itself in some women but emerge many years later as cancer of the cervix.

Dr. André Nahmias and his colleagues at Emory University in Atlanta have been studying 800 women known to have had genital herpes infections. They are being compared to 600 women who never had genital herpes.

Thus far, early stages of cervical cancer have developed eight times more often in the group with a history of herpes infection, Dr. Nahmias said in a telephone interview yesterday.

Dr. Fred Rapp of Hershey Medical Center has shown that the genital herpes virus can transform normal hamster cells to cancerous cells while growing in a test tube. And last year, Dr. Bernard Roizman and his colleagues in Chicago found genetic "footprints" of the herpes virus inside tumor cells from patients with cervical cancer.

If viruses cause human cancer, they are believed to act by subverting the genetic material of the normal cells in the manner Dr. Roizman observed.

Dr. Centifanto said she has also found part or all of the herpes virus inside tumor cells from two patients with cancer of the prostate. Many researchers believe that, if herpes virus really can cause human cancer, the male counterpart of cervical cancer may be cancer of the prostate.

Dr. Nahmias said that while Dr. Centifanto's observations are "very interesting, they are by no means conclusive. But they open a new perspective on the possible role of herpes virus in human cancer."

Dr. Nahmias said he and others were exploring the possible development of a vaccine against genital herpes. He said the only currently effective means of avoiding infection with the virus is limiting sexual intercourse to only one partner who is equally selective.

oviet Doctor ses Laser or Glaucoma

By Victor Cohn

WASHINGTON, April 5 (WP). daring new laser-beam thod of treating glaucoma, the ond most frequent cause of ndness, was reported yesterday a noted Soviet eye surgeon.

Dr. Carl Kupfer, director of National Eye Institute at the tional Institutes of Health, led the news "highly encourag-" and described the Russian tor, Michael M. Krasnov, as world leader in glaucoma sur-y.

Before a group of reporters e, Dr. Krasnov, 43, told of ecting the ruby-red laser beam his own eyes and those of colleagues before treating any ients.

asers have long been used to at other eye diseases, especial-detached retina, for which laser beam's heat is used to weld torn parts of the retina ne image-recorder at the back the eyeball.

ut the fierce heat that does re-welding is exactly the ng tool in glaucoma, where tissues to be repaired are amed and scarred by such essive treatment.

A Better Way

or a better way, Dr. Krasnov sulted Soviet physicist Alek-der M. Prokhorov, who in 1964 cowinner of the Nobel Prize American Charles Townes the laser's development.

r. Prokhorov suggested the witched ruby laser. "Q" in tronics stands for "quality or," and the Q-laser shoots ighly powerful but very short, trolled beam of amplified light its target.

ach burst lasts only about billionth of a second, long ugh to do the repair, too short heat up or burn.

Glaucoma is a disease in which aqueous humor—the fluid ch flows through the front the eye to wash and nourish cornea and lens—becomes oped. The result is a damag-increase in pressure inside eyeball, and soon damage to optic nerve.

Doctors first try drugs to relieve pressure. They also try sur-r, most recently with the help a microscope, to reopen the ged channels that are trap-g the fluid—microchannels in wall that helps hold the lens separates the front and back the eye.

Avoiding Surgery

his often works. But at best, Krasnov said, surgery is time-suming and costly and often ses complications.

hat he does with the Q-ched laser is direct 10 to 12 sts to make what he calls eropunctures" to clear out the ged channels. This is done his office in about 10 minutes. 94 patients so far, starting 1969, he has achieved good lts in 88, he said, and had esort to surgery in six.

e does have to repeat the tment periodically—every two nths in some patients but only ry seven or eight months in ers.

That this means, he explain-is that the average patient ght have to have a treatment ry six months. But this is simple compared to surgery should be much less expen-."

United Press International.

LOWER PARKING RATES—Parking meter in Champaign, Ill., has stooped to a new low as motorist smilingly inserts a coin. City officials explained that foundation for meter, under the sidewalk, has given way.

Briton Urges Birth-Curb Pill For Breeding Males Only

LONDON, April 5 (Reuters).—A British professor today proposed the urgent development of a pill which would prevent the birth of female babies and thus, he said, solve the world's population problem within a generation or two.

It could also lead to societies in which men outnumbered women between five and 50 to one, and homosexuality would be widespread and accepted.

"Polyandry [in which a woman has several husbands] might well become accepted in some societies," Dr. John Postgate, professor of microbiology at the University of Sussex, wrote in the magazine New Scientist.

"Some might treat their women as queen ants, others as rewards for the most outstanding (or most determined) males... Substitutes for normal sex, mechanical and pictorial, would be widely used."

Women's Lib Reaction

Prof. Postgate, 50, father of three daughters, did not try to anticipate the women's lib reaction to his proposal. A university spokesman said today the professor did not wish to discuss his ideas with the press.

Arguing that the real crisis in overpopulation has already started and that birth control, although essential, is failing in those areas of the world where it is most needed, he wrote:

"Imagine what would happen if a 'man-child' pill became freely available through the World Health Organization. Even in developed countries, there is a surprising prejudice among ordinary people in favor of having male children.

"Among most African, Asian, Central and South American peoples, this prejudice amounts almost to an obsession. Countless millions of people would leap at the opportunity to bred males."

For a couple of decades, the population would go on increasing. "But by then, a very large proportion would be male and infertile in the sense that . . . their opportunity to breed further would be drastically reduced."

Eventually, the population and sex ratio would stabilize, "possibly with a moderate excess of males, at a much lower total number of people. The population explosion would have been contained by a procedure wholly acceptable, even desired, by peoples in most need of control," Prof. Postgate wrote.

Free Insemination

LONDON, April 5 (Reuters).—A group of doctors headed by Queen Elizabeth's former gynecologist today recommended setting up centers for artificial insemination by donors under Britain's free National Health Service.

The centers would be for women with infertile husbands, who were already turning increasingly to artificial insemination because of a shortage of babies for adoption.

Alla Tarasova, 75, Soviet Star Of Stage, Is Dead

MOSCOW, April 5 (UPI).—Alla K. Tarasova, 75, a star of the Moscow stage whose career spanned 51 years, died today, the Tass news agency said.

Miss Tarasova was active until her death. She was best known for her performances in the title role of Leo Tolstoi's "Anna Karenina." She also appeared in several films, and had toured with Soviet theater companies in Europe and Japan.

Noah Powell

CHEROKEE, N.C., April 5 (AP).—Noah Powell, 67, principal chief of the eastern band of the Cherokee Indians, died yesterday.

He was named to the tribal council in 1965 and became the chief spokesman in 1971.

Goesta Knutsson

UPPSALA, Sweden, April 5 (UPI).—Goesta Knutsson, 65, one of Sweden's leading authors of books for children, died today after a long illness.

Mr. Knutsson, a well known radio personality who conducted quiz programs for many years, wrote a series of books for children about "Pelle Svanslos," a cat.

Extra SALT Session

GENEVA, April 5 (AP).—U.S. Ambassador U. Alexis Johnson and Soviet Deputy Foreign Minister Vladimir Semyonov, the chief negotiators at the Strategic Arms Limitation Talks, today had an unscheduled meeting that could indicate a quickened pace in SALT-2 negotiations. They met for two hours in the U.S. mission in a session which marked the first departure from the pattern of two sessions a week.

Latest Bid to Form Dutch Cabinet Fails

THE HAGUE, April 5 (AP).—Hopes for a solution soon of the Netherlands' 128-day cabinet crisis were dashed today when Jaap A.W. Burger gave up his attempts to form a government.

Mr. Burger, a veteran Socialist, was invited by Queen Juliana on Feb. 1 to solve the stalemate produced by the Nov. 29 elections. He said today that his efforts to bring the Dutch progressive parties and the traditional religious parties into a coalition have failed.

Dayan Pushes Broader Plan In Arab Area

Seeks Settlements In Occupied Land

By Terence Smith

JERUSALEM, April 5 (NYT).—Defense Minister Moshe Dayan has begun an intensive public campaign to force the governing Labor party to adopt his controversial ideas on administering the occupied Arab terrories as part of its 1973 election platform.

Taking his case directly to the Israeli public, Mr. Dayan has been speaking four and five times a week before a variety of audiences all around the country. In virtually every speech, he has proposed a new idea that—directly or indirectly—would commit Israel to keep additional parts of the Arab territories occupied in the 1967 war, particularly on the West Bank of the Jordan River.

Specifically, Mr. Dayan has called for more intensive Israeli settlement of the occupied areas, the creation of Israeli towns at certain strategic points, greater Israeli investment in the areas and fuller integration of the economies of the West Bank and Gaza Strip with that of Israel, including the unrestricted flow of Arab labor from the territories into Israel.

His latest idea, outlined last Thursday, has caused the greatest stir of all. He proposed that individual Israelis be authorized to buy land from Arab landowners anywhere on the West Bank. At present, only the government can acquire land in any occupied area.

The proposal was immediately denounced as irresponsible by Premier Golda Meir and Foreign Minister Abba Eban, who argued that indiscriminate land purchases by citizens would have the effect of making military and political policy for the government.

Along wih Finance Minister Pinhas Sapir, Mr. Eban and, to a lesser extent, Mrs. Meir have adamantly opposed any steps that would foreclose the government's negotiating options in any peace agreement with neighboring Arab states.

Mr. Dayan has countered that no such negotiation is on the horizon, that the status quo may prevail for the next 10 or 15 years and that therefore there is no purpose in the government's "standing idle" in the occupied areas.

The defense minister has responded scathingly to his critics. Using the Biblical names for the West Bank, he has argued that "anyone who says the Israelis do not have the right to buy land in Judea and Samaria had better stop teaching the Bible to his children."

Although Mr. Dayan has presented his proposals as personal ideas, they have had an immediate impact on the public. His latest proposal, for instance, already has set off a scramble among land speculators.

According to the Israeli press, builders and developers are concluding deals with Arab landowners, which hinge on eventual government adoption of Mr. Dayan's idea, for valuable property on the outskirts of Jerusalem's city limits. Israel annexed the Jordanian section of the city after the 1967 war.

The liveliest debate in Israeli political circles these days is over the motives behind Mr. Dayan's campaign to get his ideas incorporated into the Labor party platform for the general elections that are scheduled for October.

Some say that his aim is to place himself to the right of center as the likely candidate for the premiership should Mrs. Meir not seek office again.

Others say that his aim is to improve his chances of succession by forcing the party to adopt a platform that neither Mr. Sapir nor Mr. Eban, generally considered Mrs. Meir's most likely successors, could support.

Still others believe that he wants to improve his standing in the party so that if Mr. Sapir or Mr. Eban does take over from Mrs. Meir, either will consider it necessary to make his peace with Mr. Dayan first.

The consensus among veteran Israeli politicians and observers is that Mr. Dayan is likely to achieve the third goal but not the first two. Some argue that Mr. Dayan knows this and is maneuvering to increase his influence over defense and occupation policies in any future government.

French Boat Lost; Soviet Ship Probed

BREST, France, April 5 (UPI).—French naval vessels escorted a Soviet cargo ship to Brest today following the disappearance of a French trawler with a five-man crew, port officials said.

They said navy officers were seeking to discover if the Russian freighter Juzenny Burg had collided with the trawler Dany Gerard.

The officials said the Russian ship radioed a message today saying, "A fishing boat sank near us at 5:45 a.m." Search vessels and a helicopter reported finding wreckage at the position given by the Russians.

Western Intelligence Alert

New Arms, E. German Ties May Bolster Arab Terrorists

By Joe Alex Morris Jr.

BONN, April 5.—Suspect and subversive activity by Palestinian groups is on the rise in Europe.

There are intelligence reports of sophisticated new weapons which may be in Arab guerrilla hands.

Some reports pinpoint Communist East Germany as a base of operations—and possibly a training ground—for new terrorist activity.

As usual, concrete evidence of these developments is hard to come by. Western intelligence organs exchange information freely, and President Nixon has put American agencies—especially in Europe and the Middle East—in a state of high alert.

A report by the head of the Federal Office for the Protection of the Constitution, the West German equivalent of the FBI, treats these developments with utmost gravity.

The top-secret report, which has been leaked to the press, paints a grim potential picture of Palestinian terrorists, armed with sophisticated new weapons and disguised in American, British or Swiss military uniforms, attacking civilian airlines, oil installations and Israeli and Jordanian diplomatic missions. It links Palestinian organizations now banned here and recently re-established in East Germany with these plans.

Others Agree

Like all intelligence reports dealing with the possible, this one may exaggerate the actual danger, but other Western intelligence agrees with the Germans that current reports are disturbing.

The following picture could be pieced together from various sources:

Terrorist activity has remained at a fairly high level since the terrorist attack on Khartoum's Saudi Arabian Embassy, in which the American ambassador, his deputy and the Belgian chargé d'affaires were killed by members of the Black September group of Palestinian terrorists. Normally, a lull sets in after such outrages, partly because the terrorists head for cover, but also because each incident leads to a temporary tightening of security everywhere.

In the freshest incident, two men carrying Iranian passports plus pistols and hand grenades were picked up at the Rome airport yesterday. This followed by a few weeks the arrest on the French-Italian border of two Arabs with false Israeli passports and a load of weapons in their car, which had been rented in Germany.

Another Arab, who claimed to be a lieutenant in the guerrilla movement, was sentenced to 18 months' imprisonment in London today. He had been arrested in December at the airport, carrying a pistol, and told the court that he was then en route to Sweden, where an operation was planned.

There was another pickup on an intelligence tip in Austria a few weeks ago. And an Israeli, believed to be an intelligence agent, was shot in Madrid two months ago.

The West German intelligence agency's boss, Guenther Nollau, warned that the terrorists may now be equipped with anti-aircraft rockets with infrared guidance mechanisms. He also referred to "model airplanes"—apparently ground-controlled aircraft — laden with explosives which could be sent against flying or stationary aircraft at airports.

Other Western intelligence sources suspect that the terrorists may be now equipped with the Soviet version of the American "Red-Eye" missile. This is a heat-seeking rocket which can be fired from the shoulder and which is easily hidden and transported.

Many leaders of el-Fatah, the Palestinian guerrilla organization under whose umbrella Black September is alleged to operate, have visited East Germany recently, including el-Fatah boss Yassir Arafat.

When Bonn banned two Palestinian organizations after the Olympic murders last September, the Socialist Unity (Communist) party of East Germany made them welcome. A Palestinian speaker declared that "the active solidarity of East Germany is highly useful in support of the anti-imperialist struggle of the Palestinian people."

U.K. Jails Arab In Arms Case

LONDON, April 5 (AP).—An Arab guerrilla who bungled his first mission abroad was sentenced to 18 months in jail here today for smuggling a pistol and ammunition into Britain. He never got near his target, an unidentified Israeli office in Stockholm.

Abdul Karim Puheid, 24, was caught by authorities during a stopover at London Airport on Christmas Eve. They spotted his forged passport and discovered arms and ammunition in the false bottom of his suitcase.

British authorities said his life may be in danger for botching the mission. They said Puheid let it be known that if he is to be deported, he wants to be put on a plane for Kuwait rather than return to Beirut, where he came from.

Brandt Angry At Reports of Rift With U.S.

Denounces Rivals, 'Poison' Journalism

BONN, April 5 (AP).—Alleged anti-Americanism in Chancellor Willy Brandt's party touched off a fiery parliamentary debate today as Mr. Brandt reaffirmed Bonn's friendship with Washington, weeks before a surprise U.S.-German summit.

In one of his most emotional speeches in the Bundestag, the chancellor at times raised his voice to a rasping near-shout. He denounced opposition charges that alleged neutralist, anti-American dissidents in his own party have strained relations with Bonn's main ally.

Accusing the opposition of basing their claims on false press reports of U.S.-German discord, Mr. Brandt said that not even German newsmen disseminating these "canards" from journalistic "poison kitchens" in Washington could harm the solidity of the transatlantic alliance.

His heated speech came the day after the announcement that he will go to Washington for a May 1-2 summit with President Nixon.

West Germany's biggest-circulation tabloid, the anti-Brandt Bild Zeitung, bannered its front page today with the headline: "Alarm in Bonn and Washington: Brandt Hurries to Nixon." The newspaper alleged that Washington fears that Mr. Brandt will "swing even stronger on an East course" after Soviet leader Leonid Brezhnev visits here later next month.

General Jailed In South Korea On Bribe Charge

SEOUL, April 5 (NYT).—South Korean officials have disclosed that one of President Chung Hee Park's most trusted officers, Maj. Gen. Pil Yong Yoon, is in prison awaiting indictment before a court-martial.

Gen. Yoon, formerly commander of the elite Capital Security Command, was dismissed secretly from his post March 9 and was placed under house arrest. On March 26, he was imprisoned while formal charges of accepting bribes and other misconduct are being prepared.

Officials said that about 10 other officers, including two brigadier generals, and several civilians faced similar charges. The officers reportedly were followers of Gen. Yoon and the civilians allegedly were involved with them in the affair.

Since last fall, when Mr. Park declared martial law and had the constitution amended to give him nearly total power, much that has happened here has been in secret. Although there are rumors of political implications in the arrests, officials insisted that there were not and that Gen. Yoon would be brought to trial solely for violating military discipline and for conduct unbecoming a general.

To Curb Abuse of 'Speed'

40% Cut in U.S. Production of Amphetamines Is Planned

By William L. Claiborne

WASHINGTON, April 5 (WP). Federal narcotics authorities nounced Tuesday that they n to slash national production tas of amphetamines by 40 cent from last year in hopes urbing a widespread abuse of popular stimulant drug.

harmaceutical manufacturers, ording to the new regulations, ld eventually be forced to uce their production of am-tamines—commonly called eed"—up to 80 percent from year's quotas, federal offi-s said.

f the government goes to 80 percent rollback, the new ing may put a serious crimp the illicit trafficking of eed," according to the Bureau Narcotics and Dangerous gs.

ast year, pharmaceutical man-cturers produced 1,654 kilo-ms of bulk amphetamines, re-ting to an "epidemic" of abuse the drug in Washington and eral other Eastern Seaboard es, according to the Public alth Service's Center for Com-nicable Diseases, in Atlanta.

This year, the manufacturers l be allowed to produce only a maximum of 992 kilograms of amphetamines and could even be held to as low as 342 kilograms.

One kilogram of bulk amphetamines produces 100,000 10-milligram capsules.

Whether or not the BNDD will be allowed to enforce the 342-kilogram production ceiling depends, in part, on whether the Food and Drug Administration is upheld during appeals of Monday's decision to recall two types of weight-reducing drugs—injectable amphetamines and amphetamines combined with sedatives, tranquilizers and vitamins.

Even if the government is not upheld in the recall controversy, production of amphetamines next year will be 90 percent lower than it was in 1971, federal narcotics officials said.

BNDD director John Ingersoll said that the quota reductions "will remove vast quantities of abusable stimulators from stocks held by manufacturers, wholesalers, hospitals, pharmacies and physicians by the end of 1973."

Also affected by the latest BNDD order is the production of methaphetamines, a slightly stronger formula of the stimulant drug and the original "speed" capsules which were popularized in the early 1960s.

Legitimate production quotas of methaphetamines has been rolled back from 4,926 kilograms in 1971 to 561 this year, the BNDD said.

William W. Vodra, assistant chief counsel of BNDD, said that the new production ceilings stem from sharp annual declines in the number of legitimate prescriptions written for amphetamines.

Last January, for instance, 617,000 amphetamine prescriptions were written nationally, compared to 1.9 million prescriptions in May, 1971. Part of the decline resulted from an Oct. 31, 1971, FDA order placing amphetamines under the Controlled Substances Act and prohibiting prescription refills.

The sharp decrease in the legitimate use of amphetamines was accompanied by a barely perceptible increase in the use of non-amphetamine weight-reducing pills, indicating to federal narcotics agents that much of the difference was being absorbed by illicit trading of the drug.

Mr. Vodra said that the number of firms producing amphetamine capsules has fallen from 60 to 40 in the last year and that the bulk price of the drug has risen from $33 per kilogram last summer to $100 in January.

He said that the new quotas will not affect clandestinely manufactured "kitchen speed" capsules, the smuggling of illicit amphetamines ("mini-bennies") from Mexico, or the theft of amphetamines from drugstores by street dealers.

The most noticeable effect, he said, will be felt by persons who depend on legitimate supplies of amphetamines, such as truck drivers "who want a stimulant they can count on" and housewives who originally began taking amphetamines to lose weight and then became dependent on the drug.

"The hippie users are going to turn to anything they can get, so the quotas won't effect them so much," said Mr. Vodra.

OPERA

A Grand Spectacle In the French Manner

By David Stevens

PARIS, April 5 (IHT).—With the second production of his tenure as the new boss of the Paris Opéra, and the first in the company's own theater, Rolf Liebermann has quickly confirmed that he is a daring man of the theater, and a very Parisian one at that.

The work was Gluck's "Orphée et Eurydice," a revolution in opera when it first appeared, but too often these days served up in productions of genteel boredom. Last night's production may have irritated a lot of people in various ways, but it certainly didn't bore. It was a grand spectacle in the French manner and it will probably bring crowds to the opera to see—in the not entirely complimentary words of one critic—"*un objet bien parisien.*"

It certainly is Parisian. For one thing, it revives Gluck's own 1774 version, with the title role for tenor instead of contralto. This was done for the Paris Opéra of the day, but it apparently has never been seen at the Palais Garnier, the Opéra's present house. For more than a century, the work has been the repertory property of the Opéra Comique, where its most famous revival was prepared and conducted by Berlioz, with the famous contralto Pauline Viardot-Garcia as Orpheus.

If the Paris version is not done more often, it is surely in part because there are not many tenors who can cope with its high-lying and demanding part. Nicolai Gedda can, however, and he did so last night with such brilliant tone, style, and refinement of technique, that lovers of great tenor singing are urged to run, not walk to the next available performance.

This production is so closely based, musically, on the Paris version it even includes an aria probably not by Gluck at all, but which was sung at the first Paris performance anyway. One story is that the tenor Joseph Legros wanted something more florid than Orpheus's music to show off his technique, and Gluck handed him an aria by one Fernandino Bertoni. Whether Gluck or Bertoni, it has no more to do with the opera's undecorated style than a Swiss yodel. But it is a legitimate historical curiosity, and sung the way Gedda sang it —well, who cares.

So it was not a good night for purists. One might complain about one aspect or another of Manuel Rosenthal's musical version, such as the use of a large body of strings, but it was done with respect and conducted, also by Rosenthal, with vitality. He had strong support from the orchestra too, and particularly the important woodwind soloists.

Visually and dramatically, it was a feast for the eye, but a long way from Gluck's cool classical landscape. A program note reveals that Liebermann at first planned a surrealist approach, but that René Clair, who staged the work, suggested that the designer, Bernard Daydé, take the work of the 19th-century French painter Gustave Moreau as the point of departure.

The result was complex and richly colorful in its sets and costumes. Daydé used swatches of tulle and clear lighting in elaborate combinations to imitate the *tachiste* style of the artist, and occasional projections of Moreau's paintings on mythical subjects to add an almost surrealist effect. The attempt seemed to be to explore the psychological ramifications of the myth.

The setting of the opera was also arranged in a way that it seemed to double as an homage to the Palais Garnier itself, the connection apparently being the fact that the architect Charles Garnier and Moreau were contemporaries. During the overture, a huge mirror at the back of the stage reflected the partly lit auditorium, and the long ballet divertissement that ended the opera was in rich gold decors that evoked the Opéra's ornate foyer.

Nicolai Gedda as Orpheus in "Orphée et Eurydice" at the Paris Opéra.

George Balanchine's choreography, about evenly divided between sections that played an integral part in the opera and a final divertissement, showed the master at his best. The crawling demons and furies at the gate of hell were apt, the solo for Nanon Thibon as the chief *ombre heureuse* was exemplary in its classical repose, and the final divertissement—with a pas de trois, pas de cinq and pas de deux (for Ghislaine Thesmar and Michael Denard) between two ensemble pieces—was inventive, amusing and brilliant. And, despite some imprecisions, the Paris dancers have not looked so buoyant in ages.

In the two other singing roles, Jeannette Pilou was a convincing Eurydice, radiant in voice and blonde beauty, and Christiane Eda-Pierre was sparkling as Amour, the congenial deus ex machina who sets everything right. The chorus, in its important role, again gave resonant testimony to the beneficial reorganization and rejuvenation it underwent last season.

In all, then, a stylistic mixed bag and sometimes some jarring effects, but also a spectacle of absorbing visual theatrical strokes mixed with some superb singing and dancing. In a way, this "Orphée" stands in relation to Gluck much as the disputed ceiling of Chagall stands in relation to the rest of the Palais Garnier. You can lament it, but you cannot not look at it.

FASHION

Saint Laurent Shines in Paris

By Hebe Dorsey

PARIS, April 5 (IHT).—American buyers feel about the midi the way stockbrokers do about the 1929 crash.

Saint Laurent's answer today: Relax. In a beautifully pulled-together collection, which brought down the house, Saint Laurent proved that everything goes: midi and maxi capes, tweedy skirts well below the knee, safe Chanel hemlines and also mini, fringy nonsense.

Although it makes for a fast story, hemlines are not an issue. What really counts is the spirit in which the collections are done.

Of all Paris couture designers, Saint Laurent is so far the most interesting when it comes to ready-to-wear. Maybe it is because, despite his couture collection, he has, time and again, emphasized that he designs primarily for the ready-to-wear market. But today, his collection, although mass-produced, managed to look expensive, not to say opulent.

The general, daytime mood is bathed in a rustic, Black Forest ambiance, with long loden capes over box-pleated or culotte skirts and fur-trimmed boots. At one point, one of the girls had a feather in her Tyrolean hat.

It may sound heavy but it isn't because all the tweeds are lightweight and float around with the ease of jersey.

First with the long cardigan story, Saint Laurent carries on with it and updates it with a long, skinny and vertically striped version. His great winner is a cardigan, oatmeal colored, fingertip-length, in cable stitch and trimmed with fox.

Saint Laurent loves Morocco, where he owns a vacation home. It shows. His long, frog-closing capes and turbans are lifted from the fierce Touareg mountaineers.

A typical look from Saint Laurent's ready-to-wear collection.

The evening story is his: Where else could you find a jeans worn with a boa, bright satin zip-front evening parka—or marabou—on short, sexy, side-draped jersey dresses, velvet jackets or long evening dresses. His last two flowery chiffons, with kerchief hems and puffed sleeves were so light and enchanting that they brought the solid bravos that mark solid success.

* * *

The rest of Paris couturiers' ready-to-wear on view this week reminds me of a beautiful girl who married money. She can have everything except adventure. No need to knock it, though. The world craves good, sensible, salable clothes and people such as Ungaro and Givenchy are making a killing.

In beautiful, coordinated sportswear that is really the guts of Paris's current fall-winter collections, Ungaro delivers one of the best stories.

Women who can afford his clothes (all couturier ready-to-wear has gone up considerably) need not feel sorry for themselves. Ungaro's is a delicate, elegant and highly appealing signature. Besides having launched the long blouson in his couture line, an idea that is being copied all over town, it would be unfair to expect him to work miracles every three months.

Givenchy's collection was again built around elegant sportswear, with sweaters over shirts over pants—and rather more pants than in other houses. Here, too, coordination was the order of the day and was carried out almost with computer precision. His main motif was a stylized clover and all the ladies who shop at Givenchy's will be sure to know whose passport they are carrying. This designer added another idea to the evening sweater: angora streaked with gold or silver stripes.

* * *

At Dior, the story again was mostly sweaters, either with the name of the house spelled out on a checkerboard or dainty ribbon bows knitted into it. The other message that Philippe Guibourge, who does that collection for Dior, tried to put across was the return of the short dance dress. The rest was safe and predictable—and as reassuring as the airport music that came through the loudspeakers, for the first time in the history of the house.

* * *

Scherrer did not go out on a limb either with his pleated shirtwaist dresses and cardigans but he did work hard on his colors and fabrics. Problems he doesn't have. Bergdorf Goodman has set up a whole Scherrer boutique in New York and his distingué look already has a following.

* * *

Laroche showed raincoats with cape sleeves, evening blousons and black tailored suits with pillbox hats. At Patou, Angelo Tarlazzi was making his debut with a square-shouldered, aggressive military look. But his evening dresses, with long pink taffeta floating over short black skirts, must go back to the Museum of Costume.

Sharps and Flats

LONDON—Eartha Kitt at Queen Elizabeth Hall on April 7 at 7:45 p.m., and the Steve Miller Band at Rainbow Theatre, also at 7:45 the same night. Top Latin-American group, Los Paraguayos, at Royal Albert Hall April 10 at 7:30 p.m. and the Strawbs at the Rainbow April 13 at 7:30 p.m. The rock group Traffic had to cancel its Italian tour because of the customs strike. It will be at the Rainbow on April 12 at 7:30 p.m.

* * *

PARIS—Trumpeter Bill Coleman in Arcueil at Salle Jean Vilar April 6 at 9 p.m. Herns Duplan and Les Batuki of Afro-jazz fame on April 6 at 9 p.m. and the Ray Stephens Orchestra on April 7 at 9 p.m., both at the American Students and Artists Center. AGENT: Mr. DEBON, 15 Rue Alphonse-de-Neuville, 75017 Paris.

These factory premises in the district of Basle are without doubt an ideal investment for an expanding industry
for these premises, whether used as headquarters or as branch offices, have access to the whole of north-west Switzerland with its population potential of 1.2 million inhabitants as well as direct, easy communication with the rest of Switzerland and the neighbouring Common Market countries. The site at Therwil, near Basle, has furthermore not only the ideal road, rail, air and water connections to recommend it, but also comes under very attractive tax regulations.
Firms interested in investing in this plant can get all further information by applying to our Mr. R. JOHN (Tel.: Basle 23 39 50), or by filling out and sending in the following form:
We are interested in the premises mentioned above and request you to send us further documentation and detailed plans.

BEFORE THE TOURIST SEASON BEGINS MAKE THE MOST OF TWA's 747 AMBASSADOR SERVICE TO AMERICA.

Even when you're sitting in just one of TWA's specially designed lumbar support seats, you get a more comfortable flight than on anyone else's 747.

But at this time of year, we can often do you even better.

And, as more than one experienced traveller has discovered, being able to spread yourself on a TWA Ambassador Service 747 can make a big difference to a trip to America.

We can't, of course, always promise a row of seats all to yourself.

But we certainly can always promise the things which make all Ambassador Service flights better.

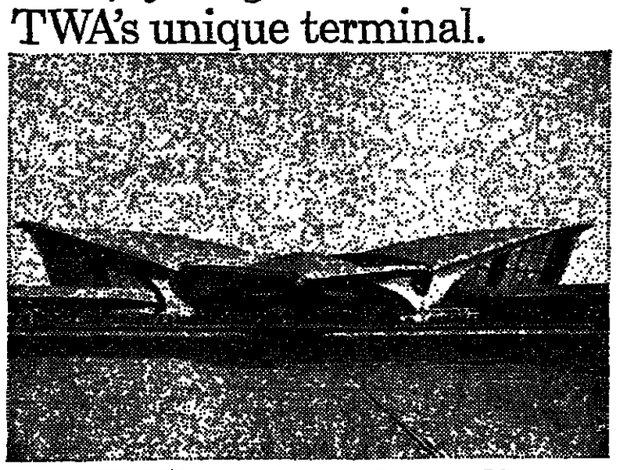

On Ambassador Service, you always get a choice of three main courses in economy.

Two films.*

Smoking or strictly non-smoking areas.

You also get the important choice of quick attention when you want it, and being left in peace when you don't.

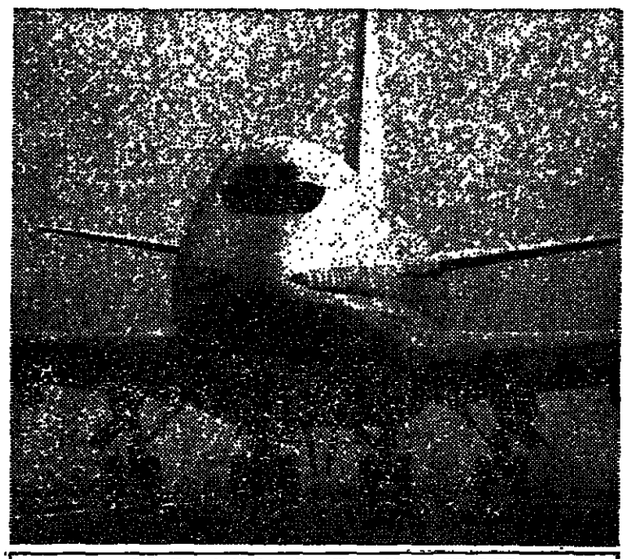

And when you get to New York, you get the benefit of TWA's unique terminal.

TWA is the only airline to have a terminal to itself at Kennedy Airport.

And as it only handles about twenty international flights a day, our terminal can usually give you one of the quickest and most pleasant entries you've ever had to the United States.

As well as convenient TWA connections to 35 US cities.

TWA's DAILY 747 SERVICE TO AMERICA	
NEW YORK	FROM LONDON, PARIS, ROME, FRANKFURT, MADRID, LISBON, ATHENS, TEL AVIV
LOS ANGELES	FROM LONDON, ROME, ATHENS, TEL AVIV
CHICAGO	FROM LONDON
SAN FRANCISCO	FROM PARIS

Try one of our daily 747s.

You'll like Ambassador Service.

And your chances of peace and quiet will be better.

TWA

THE MOST COMFORTABLE FLEET OF PLANES IN THE WORLD.

*TWA requires us to make a nominal charge for in-flight entertainment. And for alcoholic beverages in economy class.

Last week we opened in Los Angeles. This week in Tokyo.

On March 27, The French Bank of California at Los Angeles opened for business. This is our second branch in the far western part of the U.S.A.

And on April 2 we opened a branch of the Banque Nationale de Paris in Tokyo, to reinforce our broad network of banking operations in Southeast Asia and the Pacific.

For B.N.P. has branches throughout the area: in Viet-Nam, Hong Kong, Singapore, New Caledonia, and Australia.

Each of these new full-service offices - in Los Angeles and in Tokyo - means new facilities to serve B.N.P. clients. Be they French, or American, or Japanese, or others doing business on either side of the Pacific.

Paribas Links To Warburg In Share Deal

Gives Banks Access To New Markets

By Carl Gewirtz

PARIS, April 5 (IHT).—Two of Europe's most important investment banks announced today an exchange of shares, giving each other access to new business in markets where each had previously been weak.

The banks involved are Cie. Financière de Paris et des Pays-Bas, the *French holding company* controlling the Paribas group, and S.G. Warburg of London.

The exchange will be made with Paribas taking a 25 percent stake in Warburg and giving in return half of a newly formed French company it has created called Paribas-Warburg. The latter holds 25 percent of the shares of the Banque de Paris et des Pays-Bas and 20 percent each in the operations of the Paribas banks in Belgium, Holland and Switzerland.

It is not possible to put a value on the exchange as all of the banks are affiliates of larger companies, with Warburg's owned by Mercury Securities and the French banks by Cie. Financière.

10-Year Lead

The link "does not impinge on or diminish what we do well alone," said Paribas vice-president Pierre Haas. "But it gives us a 10-year jump, internationalizing our outlook," added Claude de Kemoularia, the bank's financial adviser.

The officials stressed that Britain's entry into the Common Market and the Paribas desire to participate more actively in the City of London were the major factors behind the move.

The move gives Paribas a significant foothold in London, Europe's most important financial center, while Warburg gains access to markets in France, the Low Countries and Switzerland.

Paribas has only a small branch in London while Warburg's Continental operations consist of a 28 percent share in a German bank and a 75 percent stake in a Swiss bank.

"In many ways, our operations are complementary," said Mr. Haas.

The first result of the new link will be for the two banks to merge their operations in New York into a jointly owned firm called Warburg-Paribas Corp.

For the time being, Paribas-Warburg, the new French company, is expected to be simply the instrument which links the banks, rather than an operating company.

Long-Standing Ties

The banks, which have a long-standing, active and close relationship, plan to work more closely together and, of course, will share in each other's profits.

Neither Paribas nor Warburg is associated with any of the multinational consortium banks that have been created in recent years, although Paribas has formed a number of joint operations with other banks which have a "special focus," Mr. Haas said. "But the association with Warburg goes to the core of our business," he added.

He also noted that Warburg is the first foreign bank to take a substantial participation in Paribas. The two banks will also exchange directors, but the Paribas officials were not able to say exactly how many seats each will hold on the other's board of directors.

FINANCIAL NEWS AND NOTES

L&M and Cavenham End Talks

Liggett & Myers, of the United States, and Cavenham, of Britain, say unforeseen technical problems have caused them to discontinue negotiations that could have led to an exchange of equities. However, the companies believe the benefits of an association merit further consideration and further discussions are likely. It was the second such break-off for Cavenham, food products manufacturer and distributor and an affiliate of Paris-based Générale Occidentale, in recent months. In January, after agreeing in principle to acquire Squibb Corp.'s Beech-Nut baby food operation, Cavenham terminated the accord. L&M, a diversified tobacco concern, is believed to have sought an exchange of equity or other business relationship with Cavenham to ward off possible unfriendly takeover attempts.

BP Canada May Ease Arctic Search

BP Canada may ease its Arctic islands exploration because the results of this considerable and costly activity have undoubtedly been disappointing, D.F. Mitchell, president, told Montreal analysts. He added, however, that the company has by no means written off the exploration effort in the high Arctic. Mr. Mitchell said five exploratory wells had failed to find significant hydrocarbons.

Japan's Foreign Investment Rises

Direct overseas investment by Japanese industry is accelerating, Nomura Research Institute reports. Investment rose $884 million in fiscal 1971, ended March 31, 1972, then spurted $1.775 billion in the next nine months, according to the institute, a subsidiary of Nomura Securities. This put the outstanding total of such investment at the end of calendar 1972 at $8.255 billion. Nomura noted that parity changes have necessitated "a change in basic strategy" on the part of Japanese business leaders. They are increasingly seeking to manufacture abroad, both to meet local demand and to export as a replacement for exports from Japan. In addition, some activities, such as oil and aluminum refining, are becoming difficult to expand in Japan because of a lack of suitable locations. Meanwhile Japanese labor costs are rising, encouraging companies to make use of less expensive manpower found in South Korea, Taiwan, Hong Kong and similar locations.

General Battery Gets Tender Offer

General Battery Corp.'s board has taken no action to approve or disapprove Northwest Industries' tender offer of $34 a share for all of its common stock. A joint announcement, however, said that General Battery's chairman, W.A. Shea, president H.J. Nozesky and vice-president Max Cornblatt and members of their families will tender about 300,000 shares. Northwest's offer requires that a minimum of 1.6 million of General Battery's 2.34 million shares outstanding be tendered. If all shares are tendered, the value of the transaction will exceed $80 million.

Alcan Expects Profit Rise

Alcan Aluminum sees prospects for an improving trend in earnings if the price of aluminum continues its firming trend, Nathaniel V. Davis, chairman, told the annual meeting. Earnings for the first quarter of 1973 are expected to be "a little ahead of last year, since volume of sales will exceed last year's quarter, and better price realizations should begin to be seen in March," Mr. Davis said.

Senate Votes Gold Holding

LONDON, April 5 (AP).—The price of gold jumped more than $1 in Europe today to $92 an ounce after the U.S. Senate approved yesterday an amendment which would allow American citizens to buy and hold gold for the first time since 1934.

Demand from private buyers in the United States could eventually drive up the price further. However, approval of the amendment, which is tacked to the bill that formalizes the Feb. 12 dollar devaluation, is not yet certain. It could still be defeated in the House of Representatives.

Faces Fight

The Nixon administration is believed prepared to fight the amendment in the House on grounds that permission to hold gold should be delayed until the international monetary system is reformed.

Gold opened in London and Zurich at $92, up from $90.62 in London and $90.37 in Zurich late yesterday.

But it settled back after the volatile session and closed nearly unchanged in both capitals.

Sharp Rise in Net Reported By Two Japanese Companies

TOKYO, April 5 (AP-DJ).—Two large Japanese companies today reported sharp increases in 1972 in consolidated net profit, one of them, Mitsubishi Corp., tripling its earnings of the previous year.

Mitsubishi said profit was 18.3 billion yen (about $69 million at current exchange rates), compared with 4.8 billion yen in 1971.

Sales rose to 4,804.2 billion yen from 4,591.3 billion yen.

Officials said the sharp rise in profit was due to foreign exchange losses suffered in 1971 as a result of the first yen revaluation.

In another report, Mitsui & Co., a trading company said net profit for the year ended September, 1972, rose to 15.4 billion yen from 7.7 billion yen in 1971. Sales rose to 3,949.4 billion yen from the previous year's 3,641.4 billion yen.

Mitsui also said that 1971 profit had been depressed by foreign exchange losses.

CFP Profit Declines

PARIS, April 5 (AP-DJ).—Cie. Française des Pétroles said today its provisional consolidated net profit fell 12.7 percent last year to 614 million francs from 703 million francs in 1971.

CFP said the decline was due mainly to lower prices for petroleum products in most of Europe and the cost of bringing new facilities into operations.

Deutsche Bank Net Rises

FRANKFURT, April 5 (AP-DJ).—Consolidated after-tax profit of the Deutsche Bank group rose to 206.1 million deutsche marks in 1972 from 175.5 million DM in 1971, West Germany's largest commercial bank reported today.

The group's consolidated balance sheet total climbed to 58.758 billion DM at the end of 1972 from 49.787 billion a year earlier.

Frans Heinrich Ulrich, chairman, strongly indicated that shareholders can expect at least an unchanged dividend of 9 marks a share for the current year.

He noted that Deutsche Bank is to raise its stock capital by 80 million marks par to 720 million. The new stock will be entitled to the full 1973 payout.

Pact on Textiles Said to Be Sought By GATT Panel

GENEVA, April 5 (AP-DJ).—The textile study group of the General Agreement on Tariffs and Trade (GATT) reportedly decided at a secret meeting yesterday to begin work on a possible world trade agreement on textiles.

The group reportedly will draft before June 30 a report outlining trade differences between textile exporting and importing nations. The report will propose solutions that could lead toward a textiles accord. Cotton, on which trade is regulated, would be excluded.

Delegates from the United States, Canada, the Common Market and Scandinavian countries, all textile importers, urged exporting nations to move quickly toward a trade agreement based on a study completed last December by a GATT fact-finding group, sources said.

Delegates from Japan, South Korea, India, Pakistan, Yugoslavia, and Brazil, all exporters, were hesitant to come to an agreement which some feared would severely restrict their exports, the sources added.

Both sides, however, agreed to work toward a compromise, first by clearly defining their differences and then recommending possible solutions, the sources said.

GATT sources hope importers and exporters will reach an agreement by Sept. 30, when the cotton accord will expire.

Money Supply Drops in France

PARIS, pril 5 (Reuters).—France's overall money supply declined 0.3 percent after seasonal adjustment in January following a rise of 0.3 percent in December 1972, the National Credit Council said today.

The council said the overall money supply before adjustment declined 14.5 billion francs on the month to 467.6 billion francs, a decline of 3 percent.

It added the 6.5-billion-franc state loan accounted for 1.3 percent of this downward movement and accentuated the normal seasonal decline in January.

During this period the narrowly defined money stock (coins, notes and sight deposits) fell 5.5 percent or 16.5 billion francs, with quasi-money rising only 1.1 percent compared to 1.9 percent in January 1972.

Italian Bank Joins European Grouping

LONDON, April 5 (AP-DJ).—Banca Coommerciale Italiana has joined European Banks International (EBIC), a grouping of seven banks, EBIC announced.

Other members of the group, whose purpose is broadly to promote cooperation among the banks, are Midland Bank, Amsterdam-Rotterdam Bank, Creditanstalt-Bankverein, Deutschebank, Sté. Générale, of France, and Sté. Générale de Banque, of Belgium.

Tokyo to Use Price Order In Speculation Clamp-Down

TOKYO, April 5 (NYT).—The justice minister said today that the government will invoke its price control ordinance to clamp down drastically on speculations in, and hoarding of, key consumer goods by major Japanese trading houses.

Japan's big trading concerns are being sharply blamed, in government and out, for inflationary speculation that has skyrocketed prices and brought about shortages of key commodities.

The government's national policy agency disclosed its plan to carry out shortly a raid on Tokyo's major trading house, Marubeni, to seize evidence on illegal cornerings of rice in violation of the food control law.

The company has been the focal point of speculative market operations in rice. The police said that this case was merely "the tip of the iceberg." They indicated that subsequent measures against the trading house will include a possible criminal prosecution.

Bill Before Diet

A new legislative bill designed to clamp down on commodity speculation by the nation's trading companies is now before the current Diet session.

The bill authorizes the government to investigate firms suspected of cornering commodities or restricting the sale of goods. It calls for punishment of violators with a maximum of one year in prison at hard labor.

The Minister of International Trade and Industry, Yasuhiro Nakasone, told Tuesday's cabinet session that six major trading houses had spent more than $2.5 billion on speculative business activities in the last one and a half years. The moves have resulted in sharply higher prices for land, stocks and consumer goods, he noted.

The six trading firms are Mitsui & Co., Mitsubishi Corp., Marubeni Corp., C. Itoh & Co., Sumitomo Shoji Kaisha, and Nissho-Iwai Co.

Prices Slump In N.Y. for 5th Day in a Row

Brokers Cite Gain In Wholesale Index

NEW YORK, April 5 (IHT).—New York Stock Exchange prices retreated broadly today for the fifth straight session. Brokers attributed the decline partly to surging wholesale prices.

The Dow Jones industrial average sank 1.59 to 923.46. Its lowest closing level of the year was 922.71 set on March 23. Declining issues led gainers through the trading day, closing at 947 to 464.

Turnover was light at 12.75 million shares against 11.89 million yesterday, with little apparent buying interest and light selling.

Early in the session, the government reported that wholesale prices in March continued to swell, advancing at a 26.4 percent seasonally-adjusted annual rate. The rate of gain was the sharpest since January 1951.

In news from Indochina, which brokers said tended to add to investor caution, Communist forces launched attacks throughout South Vietnam, stirring fears of a major offensive. And a "state of danger" was declared in Cambodia as Communist-led forces closed in on the capital.

Automatic Data Processing, the subject of adverse comment in a published report, sagged 3 3/8 to 69 1/8.

Other point-sized losers included Purolator down 2 1/2 to 54, Gulf & Western 1 to 24 1/2, Emery Air Freight 1 7/8 to 60 1/4, Du Pont 1 1/2 to 165, Gulf Life Holding 1 7/8 to 33 1/8, American Hospital Supply 1 1/2 to 41 1/4, Champion Spark Plug 2 to 39 7/8, and heavily-traded Sedco 1 1/2 to 33 1/4 (ex-dividend).

Also lower were Brown Group down 1 7/8 to 26 1/8, Interco 1 7/8 to 42 3/4, and Melville Shoe 1 to 26 1/8. They received bearish mention in a press report.

Liggett & Myers surrended 7/8 to 40 1/4. It said it discontinued merger negotiations with Cavenham of Britain due to unforeseen technical problems.

Alcoa dropped 1 to 51 1/8, and Exxon 7/8 to 94 1/8.

On the other hand, Helena Rubinstein climbed 3 1/4 to 28 3/8. It said it has received inquiries from parties interested in acquiring the company. But it added that no agreement has been reached.

Mercantile Stores rose 4 to 165. Directors voted a 2-for-1 stock split, and a boost in the cash payout.

Volatile Superior Oil fell 4 to 271, but Walt Disney picked up 2 1/4 to 94 1/4, and Corning Glass 1 1/2 to 102 1/2.

Prices declined in light trading on the American Stock Exchange. The Amex index fell 0.11 to 24.05, while declines topped advances, 580 against 248. Turnover was 3.01 million shares, versus 2.56 million yesterday.

Eurodollar Borrowings

WASHINGTON, April 5 (Reuters).—Liabilities of U.S. banks to their foreign branches fell $169 million to $1.121 billion in the week ended March 28, the Federal Reserve reported.

Ordered by U.S. Court

Equity Funding to File Bankruptcy

From Wire Dispatches

LOS ANGELES, April 5.—Equity Funding Corp. of America, under indictment by the Securities and Exchange Commission for fraud and numerous other violations of securities laws, was ordered by the federal district court here today to file immediately for bankruptcy under Chapter 10 of the Bankruptcy Act.

The company consented to the order after receiving official notice from a banking consortium that Equity was in default on a $55-million loan and that the group planned to seize $12.5 million of Equity Funding cash to "offset" the loan.

Wells Fargo and First National City Bank of New York were among four banks that demanded immediate payment of the revolving credit.

An Equity Funding spokesman said the bankruptcy action "appeared necessary to protect the interests of all parties, including security holders, limited partners in partnerships distributed by Equity Funding, and holders of and benficiaries of life insurance policies issued by life insurance affiliates of Equity Funding."

Loews Corp. meanwhile, said that it is considering a lawsuit against Boston Co. a banking firm, for selling it a major block of Equity Funding stock.

These were some of the latest developments in a growing insurance scandal expected to trigger dozens of lawsuits, involve major brokerage houses, banks and other financial institutions, raise charges of insider trading and, possibly, lead to criminal charges before the full situation unfolds.

Other developments included:

● In Chicago, the Illinois Insurance Department drilled open a safe deposit box of Equity Funding Life Insurance Co. at the American National Bank & Trust Co. It was empty. Some $25 million of negotiable bonds also supposed to be on deposit there is missing, if, in fact, it ever existed.

● In Seattle headquarters of Northern Life Insurance Co., another Equity Funding subsidiary, a company officer said he had "no idea" who owned the company although he said he "understood" that Equity Funding did.

● In Los Angeles, the State Insurance Department claimed jurisdiction over Northern Life and Bankers National Life Insurance Co. of New Jersey, another Equity Funding subsidiary, but may have to fight Equity Funding's bankers to move in.

The possibility that the banks may attempt to seize the two life insurance subsidiaries loomed large in view of the contract terms of the loan agreement. A company document on file with the SEC said that borrowings under the agreement were "secured" by the pledge of all of the outstanding stock of Bankers National, 91.2 percent of Northern Life and 60 percent of Equity Funding Life.

Regulatory agencies in New York, Illinois, California, Washington and elsewhere continued to press their investigations, meanwhile, for leads.

One major source of information is expected to be a group of major banks and financial investment companies understood to have had a strong position in Equity Funding stock and to have eagerly sought up-to-date information about the financial services conglomerate in the last few weeks.

The group includes:

The Boston Co., John W. Bristol Co., Fiduciary Trust Co., Chemical Bank, Bankers Trust, Ford Foundation, Morgan Guaranty Trust, Fidelity Corp., Sears, Roebuck Pension Fund, a Smith, Barney advisory company, Dreyfus Fund, Lowes Co. and others.

SEC Probe of Fund Seen Its Most Intensive Ever

By Felix Belair Jr.

WASHINGTON, April 5 (NYT).—Insiders report that the Securities and Exchange Commission investigation of its massive fraud charges against Equity Funding Corp. of America promises to be the most intensive undertaken by the agency since its formation in 1933.

In addition to probing the concern's complex system of setting up alleged spurious insurance business and fictitious assets, the commission's inquiry will extend to "inside information" that might have induced institutional investors and large brokerage firms to unload their Equity Funding shares on the market before trading was suspended last week.

Obviously disturbed by the magnitude of the alleged fraudulent practices of Equity Funding through subsidiary companies and remsurance firms, the commission's enforcement staff plans to delve deeply in its interrogation of parent and subsidiary company personnel.

"Usually, our fraud investigations penetrate three layers of company executives," a high official of the agency said. "But in this one, we'll probably be questioning anyone in a position to know anything about these fictitious insurance sales to nonexistent policyholders—and that means secretaries and file-closers if they were in a position to know about what went on."

In the wake of the first disclosures of the alleged pratices, the commission briefly considered an internal proposal that it build a "federal auditing corps," to provide closer inspection of assets and activities of registered companies than it is possible with its present personnel. The idea was vetoed at the top as wasteful and too expensive.

The idea apparently grew out of the first tentative conclusions of the agency staff that the alleged fraudulent manipulations of Equity Funding resulted from "a hole in the insurance audit procedures" of the various state commissions and which SEC audits failed to disclose.

Meanwhile, knowledgeable enforcement officials of the agency are inclined for the present to absolve the independent auditing firms of any laxity or incompetence in connection with their examination of Equity Funding books.

"There is no reason to believe at this time that the audits were not conducted with all due diligence," one official said. "There simply was no reason to suspect that executives of a well-known mutual company would go to such lengths to invent the kind of transactions that appear to have been carried on its books to form the basis for inflated assets."

The Swift Rise and Fall of Equity Funding

By Gene Smith

NEW YORK, April 5 (NYT).—Equity Funding Corp. of America, once the darling of institutional investors, rode high, wide and handsome through 1972 as a sort of financial services conglomerate.

Incorporated in Delaware in 1960, it was engaged until 1966 almost exclusively in the sale of life-insurance policies and mutual-fund shares issued by others. Then it made its strategic move into the insurance and mutual fund businesses through acquisitions of four insurance companies and the formation and acquisition of mutual-fund managers and distributors.

A major part of its growth plans under the leadership of Stanley Goldblum, its dynamic chairman and president, was the expansion of its sales force. Mr. Goldblum, a former scrap dealer and meat salesman, believed that the real competition in both mutual funds and insurance was not for clients but rather for salesmen, so he offered big commissions—as much as 70 percent of the first year's sales, plus stock options.

An article in the March 1, 1969, issue of Forbes Magazine reported that Equity Funding was then recruiting salesmen at the rate of about 150 a month and "in seven years has built up its sales force from under 300 men to 2,500 men."

By the end of 1968, the complex was selling individual life-insurance policies at an annual rate of $425 million and Mr. Goldblum projected that would increase 50 percent in 1969. Mutual fund sales were running at more than $100 million a year and net income jumped from $800,000 in 1965 to about $6 million in 1968.

In 1972, Equity Funding reported total income of $152.6 million, compared with $131 million a year earlier. Net income reached $22.6 million, or $2.81 a share, compared with $18.2 million, or $2.31 a share, on fewer shares, in 1971.

Then, on March 23, 1973, Equity Funding and First Executive Corp. announced that they had ended talks over proposed acquisition of First Executive for cash or common stock. The reason given was "the recent sharp decline in the market price of Equity Funding Stock."

That same day trading in securities of Equity Funding was suspended by the Securities and Exchange Commission. The stock stood at 14 3/8 when trading was halted. It had traded as high as 37 1/4 earlier this year and reached 46 1/2 in 1972. Its historic high was 80 in 1969.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 percent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Associated Japanese Bank (International) Limited

offers the following services:

- Euro-currency finance on a medium and long term basis.
- Foreign Exchange and Euro-dollar dealings.
- Underwriting Euro-bonds and Euro-equities.

AJB is an international consortium of leading Japanese banks and Japan's largest investment banking house.

Shareholders:
The Sanwa Bank, Limited
The Mitsui Bank, Limited
The Dai-Ichi Kangyo Bank, Limited
The Nomura Securities Co., Ltd.

Mr. Gengo Suzuki, *Chairman*
Mr. Yuji Emori, *General Manager*

BANQUE ARABE ET INTERNATIONALE D'INVESTISSEMENT (B.A.I.I.)

Companie Arabe et Internationale d'Investissement (C.A.I.I.) announces the incorporation in Paris of its first subsidiary, Banque Arabe et Internationale d'Investissement (B.A.I.I.), an Investment Bank with a paid up capital of FF 50 million.

It is recalled that Companie Arabe et Internationale d'Investissement (C.A.I.I.) was incorporated in Luxembourg on January 22, of 1973, at the initiative of Banque Nationale de Paris. Its capital of U.S. $30 million is subscribed by the following shareholders:

- BANK OF KUWAIT AND THE MIDDLE EAST,
- BANQUE DU LIBAN ET D'OUTRE-MER,
- BANQUE NATIONALE DE TUNISIE,
- GOVERNMENT OF ABU DHABI,
- GULF BANK OF KUWAIT,
- KUWAIT INVESTMENT COMPANY,
- NATIONAL INVESTMENT COMPANY (Libya),
- SAUDI NATIONAL COMMERCIAL BANK (Saudi Arabia),
- UNION BANCAIRE POUR LE COMMERCE ET L'INDUSTRIE (Tunisia),
- BANCO CENTRAL (Spain),
- BANCO DO BRASIL (Brazil),
- BANQUE NATIONALE DE PARIS (France),
- BANQUE NATIONALE DE PARIS INTERCONTINENTALE (France),
- CANADIAN IMPERIAL BANK OF COMMERCE (Canada),
- OESTERREICHISCHE LAENDERBANK (Austria),
- SOCIETE FINANCIERE EUROPEENNE, the equal shareholders of which are:
  - ALGEMENE BANK NEDERLAND N.V. (Holland),
  - BANCA NAZIONALE DEL LAVORO (Italy),
  - BANK OF AMERICA (U.S.A.),
  - BANQUE DE BRUXELLES (Belgium),
  - BANQUE NATIONALE DE PARIS (France),
  - BARCLAYS BANK LTD. (U.K.),
  - DRESDNER BANK A.G. (Germany),
  - SUMITOMO BANK LTD. (Japan),
- UNION DE BANQUES SUISSES (Switzerland).

The Board of Directors of Banque Arabe et Internationale d'Investissement has made the following appointments:

—Chairman and President: Mr. Yves TRUFFERT,

—Vice-Chairmen: Mr. Helmut HAEUSGEN, Mr. Abdelaziz LASRAM, Mr. Philippe TACLA.

The head office of Banque Arabe et Internationale d'Investissement is located:

12 Place Vendôme,
75001 PARIS.

The objectives of the new group mainly consist in participating in the financing of important projects in the Western Hemisphere, in the Arab World and also in other countries.

Generally this group will contribute to the solving of the Arab World's financial and investment problems, the new size of which will require broad, diversified and powerful international associations.

PARIS
Important English-Language Publication
seeks bright, young self-starting

ADVERTISING SALESMAN

to be responsible for Advertising Space Sales in France and Belgium.

Must be rapidly available and totally bilingual (French-English). Nationality unimportant. Experience in advertising sales and/or a proven record of successful selling would be an asset, but personal organization, drive, responsibility, and a flair for finding and closing new business are a necessity for this position.

Send resumé and photo, with salary requirements, immediately to:

Box D 3,742, Herald, Paris.

Value Line only $41.
INCLUDES DIRECT AIR MAIL
INTRODUCTORY TRIAL OFFER includes next 13 weeks full page reports, weekly, on more than 1400 stocks plus past 3 months reports already bound and indexed in two strong binders which become your property.
Available only to those who have not had a subscription at any time in the past two years. Orders must be accompanied by payment ($41 for 3 month trial). (valid until April 30, 1973)
Arnold Bernhard & Co., Inc. Dept. 13CI
5 East 44th St., New York, N.Y.
This subscription will not be assigned.

CREDIT SWISS (BAHAMAS)
Limited

SOCIETE GENERALE

A major new development in International Investment

Lloyds & Bolsa International Bank and Tyndall announce the launch of

L&BT MULTI-WAY FUND

An international portfolio of equities, property, and fixed interest securities

Lloyds & Bolsa International Bank Limited have joined with Tyndall Limited—the originators of the Multi-way investment concept—to launch L & BT Multi-way Fund. This unique fund for the first time offers investors a completely international and continuously flexible portfolio of equities, first-class commercial properties, and fixed interest securities.

Security and Stability

Thus L & BT Multi-way Fund will be able to minimise the risks necessarily involved in investing in any one country's economy—while aiming to maximise gains and profits throughout the world, wherever sound opportunities occur.

To achieve these investment objectives requires of course skilled and experienced world-wide management—which together the joint founders of L & BT Multi-way Fund can offer.

Tax Advantages

For most investors this Fund, being based on Switzerland, offers considerable taxation advantages.

Lloyds & Bolsa International Bank Limited

Lloyds & Bolsa has a wide international business with branches in Europe, Latin America and the United States, and representatives in Japan, Australasia and the Far East.
It has been long established in Switzerland with branches in Geneva, Zurich and Lugano.
Total deposits of the bank exceed the equivalent of 14,000 million Swiss Francs.

Tyndall Limited

Tyndall was started in 1962 by a firm of chartered accountants which has been established in the United Kingdom since 1818. Tyndall already provide a range of investment services to meet the needs of investors in parts of the world. The value of investments in their care now totals the equivalent of 1,500 million Swiss Francs.

If you would like full details of L & BT Multi-way Fund, minimum investment Sw. Fr. 10.000, please send in the coupon below.

To: L & BT Management S.A.
7, Rue du Marché, 1204 – Geneva.
Please send me the detailed brochure
L & BT Multi-way Fund.

BRIDGE

By Alan Truscott

South was about to suffer a heavy penalty, but took advantage of a defensive slip and turned disaster into triumph.

East-West were playing a strong-club system, so East decided that his side had no chance of game when his partner opened *one spade*. He therefore passed instead of making a normal response of *one no trump*, and thereby set South a difficult problem. All four possible actions, a take-out double, a pass, a one-no-trump bid and a two-diamond call, had disadvantages. He chose the take-out double, and the danger inherent in this course became apparent when West raised himself to two spades and North bid three clubs.

South was not inclined to let his partner struggle in a contract in which the opponents probably held the *majority of the trumps*, so he ventured three diamonds. This would have been safe enough, but a double followed by a bid usually shows a much stronger hand than South held, and North, not unnaturally, had visions of game.

Three spades by North was a cue-bid, asking South to bid three no-trump if he could stop the spades. At this point East decided that his opponents were out of their depth. He doubled the cue bid, and doubled again when North retreated to four diamonds.

West led the spade king, and East encouraged a continuation by playing the jack. West erroneously supposed that the spades could wait, since he could trap South's queen in due course. He shifted to the heart eight, which was all the help South needed to make his optimistic contract.

The declarer put up the heart ace in dummy and continued hearts. On the third round the jack fell helpfully from West, and dummy's remaining spade was discarded. Now the club queen was led, and West took the ace. He shifted to the diamond nine, aiming to stop ruffs, but to no avail.

South won in dummy with the king and ruffed a club. He cashed the heart ten, ruffed a spade and ruffed another club. When he then ruffed his last spade with the diamond ten at the 11th trick, East was helpless. He overruffed, and had to lead from his queen-seven into South's ace-eight at the 12th trick.

BOOKS

FLAUBERT IN EGYPT
A Sensibility on Tour

Translated from French and edited by Francis Steegmuller. Atlantic-Little, Brown. 232 pp. $5.50.

Reviewed by Anatole Broyard

POOR thing—she gasps for love as a carp gasps for air on the kitchen table. The man who described Emma Bovary in these terms could hardly be classified as a romantic, yet Gustave Flaubert's earliest prose was as purple as anyone's. "Oh, how willingly I would give up all the women of the world to possess the mummy of Cleopatra!" This ejaculation is a fair sample. In "November," a short novel completed before he was 21, Flaubert wrote: "Oh, to be bending forward on a camel's back ... unknown stars, four times the size of ours, throb in the skies ... but on! Still further! I long to see furious Malabar and its dances of death: the wines are as deadly as poison, the poisons as sweet as wine ..." The first version of "The Temptation of St. Anthony" must have been just as bad—or worse—for his two closest friends begged the author not to expose it to the world.

According to Francis Steegmuller the editor of "Flaubert in Egypt," young Gustave had been infected with a longing for the exotic by the romantic writers who preceded his generation, especially the poems of Byron, "Les Orientales" by Victor Hugo and the "Arabian Nights." When, in 1849, the journalist and photographer Maxime Du Camp asked Flaubert to accompany him on a trip to Egypt, he accepted. He was 27 years old: it was high time he revised his fantasies and began to taste the reality he was to render so remorselessly in "Madame Bovary."

After a series of epileptic attacks, Flaubert had given up law school and settled down contentedly in his parents' house to write. His friend Du Camp persuaded the recently widowed Mrs. Flaubert that the trip would benefit her son's constitution—and she agreed to finance it. There was no truth whatever in Du Camp's argument, for Flaubert's epilepsy had ceased with his law studies and this muscular six-footer exposed his health to far greater hazards in the arms of various Egyptian women. Taking his mother by surprise, Flaubert left a day early to avoid a tearful scene, but sobbed nevertheless all the way to Paris. There, for two days, he ate and drank lavishly and frequented brothels to fortify himself against the absence of *Mère* Flaubert.

In Egypt, where "splendid things gleam in the dust," Flaubert straightaway plunged into his unsentimental education. Unable to speak to the women he habitually sought out, he stared into their eyes and at their shaven bodies, absorbing them through his unconscious, which is a relentless editor of youthful effusions. Although he had left an intelligent mistress in France, he soon began to feel that romance is a mere surface adornment, that Egyptian women had shaved it off with their body hair. In his travel diary, recording only what he actually experienced, Flaubert began to reshape his style into the gleaming surgical instrument it later became.

For our edification and amusement, Mr. Steegmuller prints parallel passages from Flaubert's earlier Egyptian fantasies and his factual record of the trip. In the original version of the "Education Sentimentale," we find the young traveler climbing the Great Pyramid with torn hands and bleeding knees. At the top, he "sinks down half dead ... amidst the carcasses of birds come there to die." In the event itself, Flaubert experienced little difficulty and found only graffiti at the top, including the name and address of a Parisian wallpaper manufacturer. He descended through a corridor like a sewer, slipping on bat dung. His first view of the Sphinx reminded him of a dog lifting itself up out of the sand. As he and Du Camp wrote up their impressions that evening, fleas jumped on the pages of their notebooks.

In a visit to the local hospital, Flaubert observed that the syphilitic patients rose like soldiers at a signal from the doctor and exposed their sores. A psychotic woman turned handsprings at the sight of the young traveler. Rapidly becoming acclimated, our former romantic found that he enjoyed not only these stark experiences, but the smell of crushed bedbugs mingling with the barbaric perfumes of his favorite prostitute. He likes, he says, a touch of bitterness in everything. At another time, after allowing himself to be coaxed and caressed by a group of girls whose "metallic eyes rolled like wheels," he decided to abstain in order "to preserve the sweet sadness of the scene."

From day to day, we can see the diary's style grow leaner, more precise—yet without losing its suppleness, its effect of graceful and effortless movement. One has only to compare his passages with some of Du Camp's—included for that mischievous purpose—to see the difference between a journalist and an artist. While Du Camp gives us a competent travelogue, Flaubert describes two women weeping as their husbands shear and sell their hair. He shows us a sheikh accepting a box of cantharides pills ("Spanish fly") "on behalf of his father." His eye is caught by a camel that has been dying for three months of a broken back: It is watered and fed by passers-by.

Toward the end of the trip, in a letter to a friend, Flaubert says that he "feels the need to be settled." He is eager to get down to work—a different kind of work, for as he puts it: "What I have seen has made me hard to please." In time, his imagination will revisit Egypt for the third and final version of "The Temptation of St. Anthony," and for Salome's dance in "Hérodias"—but first he wants to turn his hungry eyes on a woman of his own country. For he senses in Emma Bovary a bitterness that goes beyond crushed bedbugs, a burning that not even the desert sun of Egypt can equal.

Mr. Broyard is a New York Times book critic.

7-Hits Reds

iants Win Opener n Marichal's Arm

CINNATI, April 5 (UPI).—Bonds's double scored Dave with the tie-breaking run hris Speier's two-out single a three-run seventh in- ally which carried the San isco Giants to a 4-1 victory he Cincinnati Reds today baseball season's opening

Marichal, effectively scat- seven hits, went the route for the Giants to pick up the sixth opening day victory of his career.

Don Gullett started for the defending National League Western Division champion Reds and wound up with the loss as he gave up all the Giants' runs before departing for a pinch-hitter in the seventh inning.

Rader started the Giants' winning rally in the seventh, drawing the second of Gullett's three walks in the game. The young Red left-hander then walked Marichal to set the stage for Bonds's double, which scored Rader to break a 1-1 tie. One out later, Speier singled to left, scoring Marichal and Bonds.

Marichal, making his 10th opening day start for the Giants, was touched for a run by the Reds in the second inning when Cesar Geronimo doubled down the left-field line. One out later, Geronimo moved to third on Denis Menke's single to center and then scored on Gullett's sacrifice fly. Marichal, who had an arm operation during the winter, is attempting a comeback as he had a 6-16 won-lost record last year.

Gullett limited the Giants to three infield hits through the first four innings. However, a double by Rader and a single by Tito Fuentes gave the Giants a run in the fifth to tie the score.

In the pre-game ceremonies, Capt. Edward Mechenbier, Dayton, Ohio, a POW for almost six years, threw out the first pitch of the season.

The Riverfront stadium was sold out for the opener, but the numerous vacant seats offered evidence that many fans stayed at home because of the 40-degree weather.

hreat by Leo 's Not Kept- le Pays Fine

USTON, April 5 (UPI). uston Astros manager Durocher, despite a threat sign before paying, said said a $250 fine for ing with a players' meet- in Pompano Beach, Fla., h 12.

rocher was fined by the nal League office after roke up the meeting of layers with Marvin Mil- xecutive director of the r League Players' Asso- n.

arles S. Feeney, league ident, ruled Durocher ed the owners-players' ment, and Durocher vow- *quit his job rather than* the fine. But yesterday aid. "I sent a check in a letter requesting a ng. Any other comment come from the National e office."

TABLE FORM—France's Jacques Secretin shows his skills while beating Mitsuri Kono of Japan at the table tennis world championship in Sarajevo, Yugoslavia.

Rangers Win, Age Bruins' Goalie

By Gerald Eskenazi

BOSTON, April 5 (NYT).—Jacques Plante, who has the haggard look of a 44-year-old goalie, played like one last night, as he was beaten into submission as the *New York Rangers trounced the* Boston Bruins, 6-2.

The decision, greeted by catcalls at Boston Garden, gave the *New Yorkers the first game* of this four-of-seven-game Stanley Cup East Division series against the favored Bruins

The Rangers hadn't scored six goals in their last six National Hockey League games, and in two of those contests they faced *Plante. Once he shut them out,* the second time he yielded three scores.

But he and his boisterous team*mates were stunned when the* Rangers checked them before they could get their thrusts organized.

"Maybe we weren't psyched as we should have been," admitted the Bruins' Derek Sanderson, who scored a final-period backhander against Ed Giacomin. "They *came in as the underdog. Maybe* we read so much about their not winning their last five games . . ."

He also pointed to the work of Walt Tkaczuk (who scored twice), but didn't mention Brad Park, who also got a pair of goals. Bruce MacGregor and Pete Stemkowski also scored for the Rangers.

"We brainwashed ourselves," said Park, "and everyone played a super game."

Coach Armand (Bet) Buidolin of the Bruins agreed. "They forechecked us to death," he said.

Plante's body betrayed him in the opening period. He has always had a herky-jerky style, but he used to make the plays, shoveling the puck to his waiting defense man, who would break away and go up the ice. But he gave away the disc three times in the opening session and there were murmurs from most of the 15,003 fans in this building which is as old as Plante

Still, he had the first lead in an opening period that stopped just short of trench warfare. In the opening seconds, Ken Hodge backed Giacomin against the boards. Quickly, Clark and Ted *Irvine leaped to their goalie's* defense, with Park backing off to let Irvine do the fighting (and also to avoid a game misconduct for being the third man in a fight).

Throughout the period, sticks were high but there were few good hawking moments. Both clubs appeared as nervous as kids playing for the state championship.

Doug Roberts and Park traded first-period goals, with Park's coming on the power play. It was a long shot, the first of many that would elude the old goalie.

The New Yorkers took over in the second period with four goals on only 13 shots.

In other quarterfinal round *openers of the best-of-seven* series, as reported by the UPI:

Canadiens 2, Sabres 1

Yvan Cournoyer scored a power play goal at 4:27 of the final period to give the Montreal Canadiens a 2-1 home victory over the Buffalo Sabres in their East Division game.

NHL Playoffs

Wednesday's Games

Minnesota 3, Philadelphia 0 (Hextall, O'Brien, Drouin).
(North Stars lead best-of-7 series, 1-0.)

Chicago 7, St. Louis 1 (Redmond 2, Pappin, Martin 3; Robertot).
(Black Hawks lead best-of-7 series, 1-0.)

Montreal 3, Buffalo 1 (Lemaire, Cournoyer; Ramsey).
(Canadiens lead best-of-7 series, 1-0.)

New York 6, Boston 2 (Parks 2, MacGregor, Tkaczuk 2, Stemkowski; Roberts, Sanderson).
(Rangers lead best-of-7 series, 1-0.)

The Dryden brothers, both goaltenders, Ken of Montreal and Dave of Buffalo, faced each other in a playoff game for the first time. Both brothers played well as Ken turned back 31 shots and Dave stopped 34.

North Stars 3, Flyers 0

At Philadelphia, goals by Dennis Hextall, Dennis O'Brien and Jude Drouin gave Minnesota a 3-2 victory over the Flyers in their West Division playoff.

Philadelphia's loss tied New York's record of 10 consecutive games lost in Stanley Cup playoffs.

Minnesota goalie Cesare Maniago scored the second Stanley Cup shutout of his career and blanked the Flyers for the first time this season.

Black Hawks 7, Blues 1

Dick Redmond and Pit Martin *scored hat tricks, leading Chicago* to a 7-1 home rout over St. Louis in the West Division.

The one-sided contest was set up in the first period when Redmond, who had only 12 goals in the regular season, scored twice in 18 seconds. He then got the third goal in the opening three minutes of the second period, his three scores coming in a span of 7:01.

It was the first hat trick in NHL competition for Redmond while it was Martin's first playoff hat trick.

zelle Favors Ending Ties NFL With Sudden Death

By Dave Brady

TSDALE, Ariz., April 5 —Commissioner Pete Rosterday voiced his support roposed rule change that settle National Football regular-season ties with -death playoffs.

r Hunt, president of the American Conference and of the Kansas City Chiefs, I think sudden death has chance."

had been saying he did ect approval of that pro- r the two-point conversion league meeting here be- of the "paddy-duddies" in L. Coaches on hand have retty much against both

ould like to see sudden Rozelle said on the eve ng by club owners. "The int conversion has some but I think the sudden- playoff would have more on the public and provide xcitement."

The competition committee will make recommendations today and tomorrow on several proposed rules changes.

Rozelle also said he would favor requiring receivers to catch the ball with only one foot in bounds because it would eliminate tough decisions for the officials and help offenses.

The commissioner also backed a proposal that two members of an offensive unit be permitted to touch a pass without a defensive player touching the ball in between as is now required. "I like the double-touch rule because it would help to eliminate judgment calls by the officials," Rozelle said.

He was uncertain about the proposal to move the goal posts to the back boundary of the end zone. "It would open up the area for receivers and the offense in general and minimize the short field goals but I don't know yet whether I would favor the shift," he said.

The club executives listened to a report from their NFL management council replying to charges by Ed Garvey of the NFL Players Association that Rozelle is dawdling as arbitrator in non-injury grievance cases.

John Thompson, executive director of the council, said the neutral arbitration process in injury grievances is costing more on the average than the awards.

s Gould Bows U.S. Youth mpressive

INNATI, April 5 (AP).— 's swift teen-agers smash- national records yesterday opening day of the Ama- hletic Union's indoor short swim championships.

nost impressive victory was by Kenna Rothhammer, hipped Australian Shane gain in a freestyle duel.

Rothhammer, 16, and a school sophomore from Clara, Calif., beat Miss n the 500-yard freestyle in tes 52.5 seconds. She also set the Australian star in 0-meter freestyle at the s last year.

ace was so swift that Miss timed in 4:52.7, and third- Sandi Johnson of Car- , Calif., clocked in 4:53.4, at Debbie Meyer's Amer- ndard of 4:54.1.

a Deardurff, 15, a Cin- high school sophomore, er national record in the d butterfly, clocking 56.4, evious mark was 56.64.

y Carr, 18, a University of lexico freshman, snapped erican mark in the 100 roke, doing 1:06.106. That ut the 1:06.5 Kim Brecht the nationals here three go.

Naber, 17, a high school from Menlo Park, Calif., the 200-yard backstroke n afternoon preliminaries. timed in 1:49.8. He also e finals, clocking 1:50.5.

WHA Crusaders Lead Series, 1-0

CLEVELAND, April 5 (UPI).—A goal by Ron Buchanan in sudden-death overtime gave the Cleveland Crusaders a 3-2 victory last night over the Philadelphia Blazers in the first game of the best-of-seven playoff of the World Hockey Association.

The Crusaders, who finished the season in second place in the East Division, jumped out to a 2-0 lead on goals by defensemen Paul *Shmyr and Ray Clearwater before* the Blazers tied the score on a pair of goals by John McKenzie in the third period.

Saints Gain Playoffs

CALGARY, Alberta, April 5 (UPI).—The Minnesota Fighting Saints gained a berth in the WHA's playoffs last night with a 4-2 victory over the Alberta Oilers in a sudden-death playoff game before 6,302 fans.

The game was ordered by the league after the teams had ended in a fourth-place tie in the WHA's Western Division. The Fighting Saints now open their quarter-final playoff series in Winnipeg against the first-place Jets.

The Scoreboard

TENNIS—At Houston, Marty Riessen and Arthur Ashe of the United States and Brian Fairlie of New Zealand—each looking for his second tournament victory of the year—won second-round matches in the $50,000 River Oaks tournament.

Ashe, who ranks fourth among group B of the World Championship Tennis tour, beat fellow-American Roscoe Tanner, 6-7, 7-6, 7-5. Riessen served superbly in defeating Ross Case, 7-5, 6-0, and Fairlie defeated American Tom Gorman, 6-1, 6-2. Riessen is ranked first in Group B with 37 points and Fairlie is tied for second.

Russians Skate Toward Title By Defeating Czechs on Ice

MOSCOW, April 5 (UPI).—The Soviet Union edged defending champion Czechoslovakia, 3-2, today in a battle-scarred world ice hockey match to take a major step toward regaining the title it lost to the Czechs last year.

The victory gave the undefeated Soviet Union its fourth straight triumph and kept it atop the standings with also-unbeaten Sweden, which defeated Finland, 3-2, in an earlier game today.

The loss was the second for the Czechs who also bowed to Sweden. The Soviet Union faces Sweden Saturday.

The Czech-Soviet clash was the best of the tournament and Czechoslovakia showed flashes of the form that made it world champions in 1972. But goals by Alexander Volchkov, Alexander Bodunov and Valery Kharlamov clinched the Soviet victory.

A wild third period saw two goals scored and a dozen penalties handed out as the game degenerated into fist swinging and wholesale foul play on both sides.

Bodunov put the Soviets ahead for good at 7 minutes 10 seconds of the second period when he knocked a Volchkov rebound past Czech goalie Jiri Holecek.

The Soviets increased their lead to 3-1 early in the third period when, with Jaroslav Holik out for tripping, Kharlamov swatted in a rebound.

For the Soviets, who rolled up 34 goals in their first three games while allowing only six, the game was the first time they had been extended.

The Czechs, appearing to get stronger as the game progressed, cut the Soviet lead to 3-2 when Jiri Kochta intercepted a pass, broke away and drilled a forehand past Soviet goalie Vladislav Tretjak while the Czechs were short-handed.

The brawl started minutes later when the Soviets, trying to preserve their lead, rushed Holecek. Boris Mikhailov crashed into the goalie, leading to a general free-for-all that sent three Russians and two Czechs off the ice.

After Masters' First Round

Aaron Ahead of Nicklaus by 1

AUGUSTA, Ga., April 5 (UPI).—Tommy Aaron needed a "lucky break" to take a one-stroke lead over charging Jack Nicklaus in the opening round of the Masters golf tournament today, and he got it at the exact spot his pencil decided this tournament five years ago.

Aaron, one of golf's top 20 all-time money winners but who made a scoring gaffe in 1968 which cost Roberto de Vicenzo this title, had to par the last two holes to finish with a four-under-par 68.

Aaron's trouble with the pencil came on the 17th hole that year, and it was there he ran into trouble again today with an errant tee shot.

The shot was hooked into a clump of trees on the left side of the fairway, then Aaron prayed a little as the ball slithered through and fell into an opening on the fairway.

"It was a poor drive and I got a break," Aaron said. "I was lucky it didn't hit the tree and come straight down."

Aaron went from there to routinely make his final two pars.

Nicklaus, a four-time Masters winner, the defending champion and pre-tournament favorite as usual, came along several hours later with a chance to tie or pass Aaron and barely missed.

His 25-foot putt for an eagle at the 475-yard par-5, 13th hole hit the cup and stayed out. Then at No. 15, another par-5 of 520 yards, Nicklaus hit the cup with a blast from a sand trap on his third shot, and again the ball lipped out.

He finished with a 69.

Unusually blustery winds on a cool day at the famed Augusta *National Course forced many of* the scores high into the 70's and no one was more chagrined than Arnold Palmer, like Nicklaus a four-time champion.

Palmer, who described himself as unusually "elated" before the start of the competition, shot a five-over-par 77 and said he did "nothing" right all day. It was the highest first-round score Palmer ever shot in the Masters.

J. C. Snead, whose uncle Sam won this tournament three times, and Bob Dickson, a former U.S. and British amateur champion who described his pre-tournament hopes as "slim and none," were tied for third at 70.

Grier Jones and Phil Rodgers were the only other players shooting sub-par rounds with 71.

A group at 72 included Cesar Sanudo, former PGA champion Dave Stockton, Chi Chi Rodriguez and Mason Rudolph

weather.

Aaron, who said his game had been in pitiful shape before today's 32-36 tour of the 6,980-yard Augusta National Course, joked that he had "been hitting everything pretty good but my *woods and irons.*"

"I wasn't real optimistic starting the round today, especially the way the wind was gusting. Then I hit a good drive on the first hole and a good second shot, and that made me feel a little better."

He felt better still when he sank a 15-foot putt for a birdie at the 400-yard opening hole and followed that with another birdie at the par-5 second.

Aaron hit a five-iron a foot from the hole for a birdie at the 190-yard sixth, and ran in a 15-foot putt for still another birdie.

This has been one of the poorest years ever for Aaron, golf's No. 17 all-time money winner with $683,364 but a reputation earned mostly for what happened here in 1968.

In that instance, Aaron was De Vicenzo's playing partner and scorer, and he wrote down a "4" for De Vicenzo instead of the birdie three he actually made at the 17th hole of the final round.

De Vicenzo overlooked the error, signed the incorrect scorecard, was stuck with the higher score and lost the title by one stroke to Bob Goalby.

Nicklaus, who "of course" heads that all-time money list with nearly $1.8 million, said "considering the wind conditions and not being sure what club was coming out of my bag, I thought I had a good round."

Celtics Take a 2-0 Lead In Playoff; Knicks Win

ATLANTA, April 5 (UPI).—The Boston Celtics, led by John Havlicek's 29 points and Dave Cowens's 25 rebounds, routed the Atlanta Hawks, 126-113, to take a 2-0 lead in their National Basketball Association best-of-seven playoff series.

The game even wasn't as close as the final score indicated. The Celtics were only challenged once, midway in the second period when the Hawks came to within two points at 35-33. Boston then scored 10 quick points and the Eastern Conference game was never close again.

Although the Hawks managed to keep Havlicek from coming near his 34-point total of the first playoff game, Cowens and Jo Jo White picked up the slack with 30 and 22 points, respectively, and the Celtics dominated the backboards, 59-44.

Pete Maravich and Lou Hudson led the scoring for the Hawks with 31 and 27 points.

Knicks Lead Series, 3-0

At Baltimore, Bill Bradley sparked a balanced attack with 23 points as the New York Knicks beat the Bullets, 103-96, to take a 3-0 lead in their best-of-seven Eastern Conference playoff series.

Bradley hit six straight free throws in the final two minutes of the second quarter as the Knicks broke away from a 40-40 tie and moved to within one victory of eliminating the Bullets from the first round.

Dave DeBusschere scored eight *of his 19 points in the third* quarter as New York went from a 49-46 half-time advantage to lead, 74-65, after three periods.

Earl Monroe had 18 points and Walt Frazier added 16.

Stars Win 2d

SALT LAKE CITY, April 5 (UPI).—The Utah Stars ran away from San Diego in the final quarter to win their second straight American Basketball Association playoff game, downing the Conquistadors, 103-92, last night.

The Stars, running with the ball in the final quarter, broke up a close game to take a 2-0 lead in the best-of-seven series.

Willie Wise scored 29 points for Utah while guard Ron Boone added 22.

NBA Playoffs

Wednesday's Games

New York 103, Baltimore 96 (Bradley 23, DeBusschere 19; Hayes 36, Clark 21).
(Knicks lead best-of-7 series, 3-0.)

Boston 126, Atlanta 113 (Havlicek 29, White 22; Maravich 34, Hudson 27.)
(Celtics lead best-of-7 series, 2-0.)

Book Traces Many Sports To Some New Birthplaces

LONDON, April 5 (AP).—Any red-blooded Scot would argue that the game of golf began centuries ago just a good tee shot from Troon, site of the 1973 British Open championship.

But according to a new book published in Britain, the Scot would be talking through his Tam o' Shanter. And so would the patriotic American who said that baseball was indigenous to the United States.

The book "How Did Sports Begin?" by Dr. R. Brasch of Australia, disputes a host of widely held sports traditions. It is published by Longman.

Brasch, a writer, broadcaster and university lecturer, has delved into the origins of man at play and come up with some surprising answers.

He finds the beginnings of soccer in China in the second century A.D. This bit of information will sadden English pundits who are convinced their ancestors began the game by *kicking around the severed head of a Danish invader.* Apparently it was a popular sport, but it came a few centuries later.

Basketball, says Brasch, "has the distinction of being the only major competitive sport which began on American soil."

"All other so-called *new games were adaptations of* established sports," he says.

But baseball's birth was far more difficult to define.

"Baseball," says Brasch, "is second to none in the confusion that surrounds claims about its origin."

Despite all legends to the contrary, Brasch contends, baseball can be traced to rounders, an English game with similar rules and features.

And golf? The popular story is of a Scottish shepherd's passing the time by knocking pebbles through the air with his crook until one fell by chance into a rabbit hole. When he tried to repeat the shot, a friend saw him and challenged the shepherd to the first game of golf.

But Brasch says a sport known as paganica among the ancient Romans was the forerunner of modern golf.

Tostao Career Uncertain

HOUSTON, April 5 (AP).—The career of Brazilian soccer star *Uduardo (Tostao) Andrade* was uncertain yesterday when doctors here revealed Tostao had undergone eye surgery for a second time.

Observer

Made Perfectly Clear

By Russell Baker

WASHINGTON—Impressions of what happened in the Watergate affair, recorded after eight months of relatively diligent struggle with the newspapers:

One night last spring three patriots named Hunt, Liddy and McCord fell to talking about what a terrible blow America would suffer if the U.S. government should ever fall under the sway of a political party that recognized Fidel Castro's regime in Cuba.

Baker

McCord said that could never happen here because no such political party existed in America.

"That's what you think," said Liddy. "Have you ever heard of the Democratic party?"

McCord said he hadn't. Neither had Hunt.

Liddy asked them where they had been all their lives.

McCord said he had spent most of his time trying to keep Martha Mitchell from using the telephone, and Hunt said he had been terribly busy writing spy novels.

Liddy told them about the Democratic party and a man named McGovern. They were shocked.

* * *

"A man like that, backed up by a political party of that sort," said McCord, "might not be content with recognizing Red Cuba. He could wind up recognizing Red China or signing a sweetheart contract with Red Russia to give them American grain cheap."

They agreed that the Democratic party had to be stopped from selling out America and went to the Watergate where they were arrested for breaking and entering.

As luck would have it, John Mitchell had to quit as the President's right-hand man at about this time, because he needed more time at home to keep a firm hand on the telephone, but certain small-minded people suggested it was because he had had something to do with the Watergate.

Mitchell denied everything. Everybody, in fact, denied everything. Ronald Ziegler denied everything with great regularity. Dwight Chapin and H. R. Haldeman denied everything on television, and even President Nixon must have denied everything at some point.

Who was Dwight Chapin? Or should it be, who *is* Dwight Chapin? And if it is, then who is Segretti. Did Segretti, in fact, have garage space for his Maserati at the White House.

The question of Chapin's identity hung on for months until Chapin quit the White House for the airlines business, and after that it didn't seem to matter, since it would have been denied anyhow.

The important thing about Chapin was that he knew Segretti, who came from California and had attended one of those orange juice colleges where they cut their teeth on dirty politics at the fraternity house and then go into the CIA or big-time advertising.

Nobody has ever discovered who Segretti was, which was just as well, because the FBI was leaking everything it learned either to the White House or Sen. Sam Ervin.

Naturally, this angered Judge Sirica. Nothing at all was being leaked to him. Nobody would even say anything for the record in his courtroom, and the White House denied it all.

When John Dean was discovered on the White House staff, newspaper readers were incredulous, for they had assumed that he was locked in the secret safe in the secret White House office assigned to Hunt.

Dean told the FBI he didn't know what was in Hunt's safe, but said its contents did not include him, Dean.

FBI director Gray told several senators that Dean "gives me the willies," and explained, "He's got the smell of Hunt's White House safe all over him."

To clear up all the confusion, President Nixon announced that the White House had nothing to hide and ordered everybody on the White House staff to keep his mouth shut unless he had an okay from Marlon Brando to talk.

Next: How to tell Lon Nol and Souvanna Phouma from the Old Moulmein Pagoda.

Underground in Russia

By Hedrick Smith

MOSCOW, (NYT).—Vladimir Vysotsky, a young movie star and dramatic actor who has built a wide following among young people with his throaty, underground songs that often parody Soviet life and the Establishment, has been officially scolded for giving illegal concerts.

Sovetskaya Kultura, the new cultural organ of the Communist party's Central Committee, last week criticized him sharply for violating rules for concert tours. The publication implied that he was pocketing illegal funds for privately arranged concerts with the connivance of officials of provincial cities.

There was only an indirect hint that the real issue might be the content of some of his songs, rather than his concert arrangements. Either way, the intent of the attack seemed to be to curtail both his activities and his growing popularity.

In recent years Mr. Vysotsky has recorded popular official hits. A lively trade has developed in tapes and cassettes of his witty and sometimes provocative parodies of Soviet bureaucracy, rank-conscious officialdom, pervasive thievery from public institutions and the compulsive drive of prestige-minded leaders for victories in the world sports arena. These are often recorded, Muscovites say, in late-night guitar sessions with friends and admirers.

Admissions

In the cultural world of Moscow, he is a favorite for private parties, and even Communist party and government officials of middle rank admit discreetly to having tapes of some of his risqué songs.

"I'm surprised he's not in prison for some of the things he sings," commented a Muscovite with a keen sense of what is permissible. But Mr. Vysotsky has managed to walk a tightrope by giving the general public officially approved songs or those that are only slightly off-color, saving his most sensitive offerings for a small circle of like-minded friends.

One, named "Seryozhka Fomin," lampoons high officials who sat out World War II on the home front, awarding themselves the nation's highest decorations:

While I shed my blood for the country and for home.
Something always burned me up inside:
I was bleeding for Seryozhka Fomin,
While he sat back and did not risk his hide.
At last the war was over.
The heavy burden from our shoulders passed.
I met Seryozhka Fomin. Lo—"S"—hero of the Soviet Union—on his breast.

Many other Vysotsky songs deal with the generally taboo topic of Soviet labor camps in Siberia, where Mr. Vysotsky reputedly spent some time before 1955. One song gives the flavor of life in the camps:

We're both done for and through a fluke.
He for embezzlement and I for love of Ksenya.
The Cheka [secret police] pounced on both of us,
And now Petrov and I are inmates.
And in the camps there is no life at all.
Surrounded by railroad thieves and housebreakers,
We are mistreated horribly by every-one.
And exploited in very strange ways.
As for the government, they just don't give a damn.
Why and how a prisoner is a prisoner.
So we decided to escape one day
But our plan ended unsuccessfully.
We are tormented all the time by prison guards.
While the chief doctor wants to make lovers of us.

Mr. Vysotsky, who is about 40 years old, is the third semiofficial political troubadour to become well known in recent years. Before him, two writers, Bulat Okudzhava and Aleksandr Galich, were punished for their risqué songs. Mr. Okudzhava was expelled from the Communist party last year and Mr. Galich was expelled from the Writers Union because he refused to disavow foreign publication of his sharp satires of Stalinism and Soviet political life.

'Unequal' Merit

Most Soviet intellectuals find Mr. Vysotsky milder by comparison, especially when he sings before large audiences. Nonetheless, Sovetskaya Kultura indicated official dissatisfaction with some of his songs by noting that their "literary merits are not always equal" and by quoting the head of the official concert agency as complaining that his concert programs were never "approved and confirmed."

Normally, concert arrangements, lists of songs and their lyrics must be checked out and approved by censors and concert officials.

The thrust of the attack on Mr. Vysotsky was directed against his obviously successful practice of arranging concerts outside official channels, even when he managed to use official halls.

NYT.

Vladimir Vysotsky
...parodies Soviet life.

He was specifically accused of having given 16 concerts in four days in the industrial city of Novokuznetsk, in violation of regulations against more than one concert a day. He was not on the list of artists permitted to give solo concerts, it was charged.

He was able to arrange these concerts—and reportedly many others not mentioned in the article—by operating, as Sovetskaya Kultura observed with clear disapproval, "through private channels," and booking "on the strength of a personal agreement with the director of the local theater, D. Barats, and with the collusion of the district cultural department."

"They decided to capitalize on the popularity of the artist," Sovetskaya Kultura added. "The director of the theater violated all laws and regulations by offering the artist a 'commercial transaction' and the artist violated all ethical norms by agreeing to this, knowing in advance that he was going to do hack work."

The dates of the concerts were not given, though the paper said that about 1,000 people crammed the hall each performance. Nor was there any disclosure of any punitive action against Mr. Vysotsky, a leading actor at Moscow's Taganka Theater, where he plays Hamlet in a most up-to-date version of the classic. But he has been in trouble before, and each time he has managed to bounce back.

PEOPLE: *A Royal Wedding and Back to the Commune*

The son of **Lord Harewood** and his ex-wife, now **Mrs. Jeremy Thorpe**, wife of the Liberal party leader, was married Wednesday to an American. **James Lascelles**, 19, who is Lord Harewood's second son and 20th in succession to the English throne, married **Freddy Duhrssen**, 19, in the 14th-century village church in Worth-am, England. The groom showed up for the ceremony in his best Tibetan wool jerkin over a green shift shirt and leather cream jeans. The bride wore a cream silk, satin and lace gown once worn by the groom's grandmother, the late Princess Mary, the princess royal, to a coronation. First came the traditional Church of England ceremony then a second ceremony during which the two exchanged vows—and Tibetan rings—to the accompaniment of Asian songs and drums. Then back to the nearby commune where the newlyweds (and the bride's mother) live.

* * *

Actor **Rod Steiger**, 47, and **Sherry Nelson**, a 36-year-old secretary, have taken out a marriage licence. Steiger has been married twice before, Miss Nelson, once.

* * *

THE SICK LIST: Film star **Susan Hayward**, 53, is seriously ill in a Los Angeles hospital, to which she was admitted a week ago. The nature of her illness has not been disclosed. Composer **Benjamin Britten**, 59, was admitted to a London hospital Wednesday for treatment of a heart ailment. His agent said that Britten will probably have to cancel all engagements for the next three months and may miss the world premiere of his new opera "Death in Venice," scheduled for a London production in June.

* * *

Gleanings from the British Council Calendar, Brussels: "The Assistant Representative I has been invited to give a talk on 'Style Beyond Correctness in English' at the Ecole des Interprètes Internationaux, Mons, on 25 April." So much for correctness.

* * *

CRINGING: **Samuel Justice** as irate **Alice Cooper** fans lambast him for yesterday's blunder. Alice Cooper is not a she but a he. Apologies, especially to Alice. SUING: Four men who say they were beaten and arrested after trying to shake hands with **Elvis Presley** during a Las Vegas performance are asking $4 million from Presley and the Hilton Hotel. The assault and battery suit filed in Los Angeles Wednesday also names "40 John Does." Plaintiffs are **Kenneth MacKenzie**, his brother **Robert, Mario M. Martinez** and **Marcelo Elias**. Their attorney said they were beaten before being jailed for vagrancy last Feb. 19.

* * *

Gerrit J. W. Heyneker of La Celle Saint-Cloud reports hearing the following USIA bulletin: "President Nixon is asking Congress for authority to suspend tariffs on selected items as a companion measure to the new controls on meat prices; three examples where the authority would be used: the 3 1/2 percent on beef, the 2 1/2 percent on lamb and the 12 1/2 percent on plywood."

* * *

Metropolitan Opera soprano **Mary Costa** will have a second chance to perform at the White House. Scheduled to sing at a state dinner on Feb. 1 for British Prime Minister **Edward Heath**, she sprained her back and had to cancel. Now, she has been invited to sing at another state dinner being given next week by **President Nixon** for another visiting prime minister, **Lee Kuan Yew** of Singapore.

* * *

Actor **Steve McQueen** is suing four Japanese companies for $1 million for using his picture in advertisements without his permission. Tokyo court officials said the suit named the Towa Motion Picture Company, Matsushita Electrical Company, Dentsu Advertising Agency and the Yakult Dairy Products Company. McQueen says a still picture of him as a racing driver, from the movie "Le Mans," was used by Matsushita in advertisements for a transistor radio and by Yakult in TV commercials.

* * *

Singer **Joan Baez** will refuse to pay part of her federal income taxes again this year as a protest of U.S. military spending. Her agent, Roy Kepler of Menlo Park, Calif., said that Miss Baez has been making such deductions for the past eight years. And for the past eight years, Kepler said, the Internal Revenue Service has collected the missing portion, usually by attaching her bank account. "She's a pacifist and she's always protested the amount spent on arms."

—SAMUEL JUSTICE.
